**RE: DA2020/1097 - 0 Campbell Parade MANLY VALE NSW 2093**

I would like to lend further support to the proposed lighting at Passmore. As coach of one of the St Augustines teams that train on this ground mid-week I can confirm that the daylight hours are very limited in winter with long periods where we can only train teams after school from 4pm to 5pm. Lighting would greatly expand the usable hours for training at the ground for more teams and also add the potential of hosting competition matches at night time etc. This will relieve pressure further on the council and associations to allocate grounds for high participation sports such as soccer during the winter season. It will also provide a nice flow through in the evening to Nolans Reserve for people using the footpath for other forms of exercise/recreation in the local area.
