Officer comments

The application to re-orient the swimming pool and further encroach within the foreshore building line (FBL) is not supported.

The proposal fails to limit impact within the FBL, and the result is that the built form would be dominant when viewed from the water. A key outcome of D12.1 is to reduce bulk and scale. There is no proposal to reduce this impact through substantial landscaping including canopy trees and understory planting.

C1.1 requires that a range of lowlying shrubs, medium high shrubs and canopy trees shall be provided to soften the built form.
