**RE: Mod2019/0654 - 1 / 5 Skyline Place FRENCHS FOREST NSW 2086**

To the Council

My husband and I have viewed the submission for Skyline Place .

We have lived in Bimbadeen Cres for 26 years and have appreciated the development of our suburb - even embracing the new hospital which has impacted our lives with constant dirt ,health issues and loss of sleep from constant night works from construction of the building and roads for the last five years then also dealing with the consequence of the constant Car parking congestion in our street from hospital Workers and visitors.

Now we are asked to accept a 6 storie complex of a new development when all parking has been removed from Frenchs Forest Road - contesting our street and return to building works that will impact our health and tower over our homes and reduce our privacy . Is not a 4 storie building acceptable As is there at present ? When will the residents lives be considered over developers financial gain ?

The proposed 6 storie development Is too close to the Frenchs Forest road and Bimbadeen Crescent and no amount of vegetation will obscure this over height building that will destroy our privacy and our residential suburb.
