Subject: Objection for DA2021/0311 (Lot 7 DP 36192)

Narraweena is a peaceful community. We have several reasons against the development at 2 The Circle Narraweena.

—The location in Narraweena is R2 low density and this 12 units proposal is not comply.

—Kids Safety. We concern about children security issues. What kind of people are going to living there? Unstable occupants increase the risk. The property adjacent to Beverly Job Park. Two primary school students are always be there to do activities. My daughter is at Make a difference at Oceana Childcare. They have trip to the park regularly. And there are also weekday evenings and weekends sports.

—Parking. The block only supply 7 car parking for 23 people and move left 16 parking and visitor parking pressure to off street parking. There are several public parking nearby the location, but for Beverly Job Park visitors. The plan make off street parking over affordable and is going to lead public resources erosion. That is not reasonable and fair for all Narraweena and surrounding community residents.

—Traffic risk. The Circle is a kind of street 3 cars wide. As the development is at a corner, many off street parking along both sides can block driver's sight and increase traffic risk. For pedestrian and lots of kids passing to the park, there is going be more dangerous.
