**RE: DA2020/1097 - 0 Campbell Parade MANLY VALE NSW 2093**

I write to object to the proposed installation of additional lighting at Passmore Reserve. Whilst I strongly support sporting activity for all ages as being beneficial for our community, I must strongly object to this particular proposal on two grounds which will impact the local community, namely noise and parking/traffic. Claims in the Environmental Statement that there will be no impact on these under the proposal would be laughable if not so serious.

**Noise**

The statement claims that (to paraphrase) there will be no change to the intensity of noise, but it will just be spread over a longer period. Surely no one could claim that noise from a sporting field on a weekday evening is not more intrusive than on busy Saturday afternoon!

**Parking/Traffic**

Once again the Statement claims that intensity of usage will just be spread over a longer period. Any resident of Campbell Pde or any of the surrounding streets is well aware of the diabolical parking and traffic problems that already exist. Also, there is even less parking available in the evenings when there are many more residents at home.

In conclusion, I would question the premise that sporting activity will not increase on the reserve as a result of the proposed additional lighting. If this is in fact the case, surely the need for the lighting is questionable.
