RE: DA2020/0552 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

I strongly object to DA 2020/0552 181 ALLAMBIE RD for the reasons outlined below:-

I believe that this development disregards the beauty and environmental significance of the natural environment it backs onto and intrudes upon. The catchment area hold many endangered and protected native flora and fauna and the proposal will inevitably endanger the environment they need to survive. Alterations of the natural landscape through excavations will furthermore damage these volatile ecosystems and going ahead will have negative rammifications upon both the sensitive hydrology and topology of the site and surrounding area. Both Manly Dam and Curl Curl Creek catchment are places in which greatly benefit both the community through environmental engagement and are critical for the protection of flora and fauna of the area. Development of this site for senior housing would ultimately be inappropriate, favoring unnecessary residential development over volatile ecosystems that need to be protected and conserved for future generations.
