

## Natural Environment Referral Response - Riparian

Application Number:	DA2020/0219
Date:	19/03/2020
То:	Kent Bull
Land to be developed (Address):	Lot 30 DP 204399 , 185 Prince Alfred Parade NEWPORT NSW 2106

#### Reasons for referral

This application seeks consent for the following:

- All Development Applications on land, and located within 40 metres of land, containing a watercourse, or
- All Development Applications on land containing a wetland, or located within 100m of land containing a wetland,
- All Development Applications on land that is mapped as "DCP Map Waterways and Riparian Land".

And as such, Council's Natural Environment Unit officers are required to consider the likely impacts on drainage regimes.

### Officer comments

This application has been assessed against:

State Environment Planning Policy (Coastal Management) 2018 Part 2, Division 1, Clause 10 & 11

Part 2, Division 3, Clause 13

Pittwater 21 Development Control Plan B5.8 Stormwater Management B8.2 Erosion and Sediment Management

This application proposes to significantly increase impervious surfaces and therefore a sediment control pit or equivalent primary treatment, which collects leaf litter and course sediments, is to be installed prior to the discharge of stormwater from the land. The applicant must make provision for convenient and safe regular inspection, periodic cleaning, and maintenance. Standard sediment erosion controls must be installed prior to construction and removed only once ground cover has been established to prevent the migration of sediment offsite.

With these conditions the application is unlikely to cause adverse impacts on the integrity and resilience of the biophysical, hydrological and ecological environment. It is therefore recommended for approval subject to conditions.

DA2020/0219 Page 1 of 3

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

#### **Recommended Natural Environment Conditions:**

# CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE

#### **Water Quality Management**

The applicant must install a filtration device (such as a sediment control pit or absorption trench) that captures organic matter and coarse sediments prior to discharge of stormwater from the land. All stormwater treatment measures must make provision for convenient and safe regular inspection, periodic cleaning, and maintenance.

Details demonstrating compliance are to be submitted to the Certifying Authority for approval prior to the issue of the Construction Certificate.

Reason: Protection of the receiving environment

## CONDITIONS THAT MUST BE ADDRESSED PRIOR TO ANY COMMENCEMENT

#### **Installation and Maintenance of Sediment and Erosion Control**

Sediment and erosion controls must be installed in accordance with Landcom's 'Managing Urban Stormwater: Soils and Construction' (2004).

Techniques used for erosion and sediment control on site are to be adequately maintained and monitored at all times, particularly after periods of rain, and shall remain in proper operation until all development activities have been completed and the site is sufficiently stabilised with vegetation.

Reason: To protect the surrounding environment from the effects of sedimentation and erosion from the site.

# CONDITIONS WHICH MUST BE COMPLIED WITH PRIOR TO THE ISSUE OF THE OCCUPATION CERTIFICATE

### **Stormwater Treatment Measures**

Works as Executed Drawings for the stormwater treatment measures must be prepared in accordance with Council's Guideline for Preparing Works as Executed Data for Council Stormwater Assets.

The drawings shall be submitted to the Principal Certifying Authority prior to the release of the Occupation Certificate.

DA2020/0219 Page 2 of 3

Reason: Protection of the receiving environment

# ON-GOING CONDITIONS THAT MUST BE COMPLIED WITH AT ALL TIMES

## **Maintenance of Stormwater Treatment Measures**

Stormwater treatment measures must be maintained at all times in accordance with manufacturer's specifications and as necessary to achieve the required stormwater quality targets for the development.

Northern Beaches Council reserves the right to enter the property and carry out appropriate maintenance of the device at the cost of the property owner.

Reason: Protection of the receiving environment
