To whom it may concern,

I am a local resident and am writing in support of the local food markets Mod2021/0047

**This is a market that we as a family have come to love to get our weekly supply of food, supplies and gifts for the past year. We work during the week so this is the only time we as a family can attend. As a local small business myself, I like to support other local businesses by keeping food on the table for their families. My children and I love to walk around the stalls looking a different things and discuss what they are and trying them. We meet other lovely local people and get to be part of the community. What will these business stall holders do without the support of us and the community? Where will they get their income to support their family? These markets are not just important to us as customers but more so the stall holders where this is their source of income. During this past year of uncertainty, my mind boggles why it is even a thought to shut down the only source of income for some stall holders and take away the community even from us consumers?**

Kind regards
