RE: DA2020/0442 - 231 Whale Beach Road WHALE BEACH NSW 2107

If you go to whale beach there is something you'll notice. That thing is the fact that there are no apartment buildings in the whole geography of whale beach. It's one of the last few beached in Sydney where trees cover between the structures of humanity. This monstrosity is a complete and utter disgrace to the community I as many others live in and try to preserve and cultivate. Yes the old building need regent attention however replacing it with an obnoxious LEGO block of plastic construction and space age architecture will not contribute ANYTHING to our community which already struggles from its foundations in these difficult times that the wealthy seem to undermine with their advantageous neglect for nature and community. This disgusts me.
