RE: Mod2022/0090 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

Dear Clare,

I am writing to express my concerns in regard to the Section 455 Modification that has been submitted for DA2020/0661.

Firstly, I am very disappointed that once again the incorrect location name has been used. It is not on Hudson Parade, but in John Fisher Park. This incorrect naming of the proposed site wrongly misleads the local community. Therefore I request that letters of notification should be re sent with the correct location name.

Secondly, it is vital that Condition 10 is met and planting is done around the infrastructure. The purpose of the planting is to minimise the visual impact of the telecommunication box, an issue the local community is very concerned about. I am still astonished that this project was ever approved, on Crown land, in an environmentally sensitive area. In light of the recent rainfall and flooding it has become more important than ever that vegetation cover is preserved and planting is done to help maintain the banks of the lagoon and provide soil stability. Therefore it is paramount that planting is done.

In addition, I think it is only fair that the meeting notes between Service Stream and Council are disclosed. It is important that there is complete transparency between all parties, particularly as a large majority of the local community are against this project in the first place.

Kind regards

Alice O'Connell
