RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

The Seawall looks like it will enhance sand erosion to the area. Has sand replenishment been considered ? Will it cause long term damage to the beach given more frequent intense storms? At what length for in the future will council be assisting protect private Property from storm, fire and future flood inundation from more frequent climate events. Hopefully it will fairly economically support all communities??
