

Natural Environment Referral Response - Biodiversity

Application Number:	DA2025/0617
Proposed Development:	Alterations and additions to a water recreation structure
Date:	06/06/2025
Responsible Officer	Anaiis Sarkissian
Land to be developed (Address):	Lot 44 DP 13620 , 963 Barrenjoey Road PALM BEACH NSW 2108

Reasons for referral

This application seeks consent development on land, or within 40m of land, containing:

- All Development Applications on
- Actual or potential threatened species, populations, ecological communities, or their habitats;
- Wildlife corridors;
- Vegetation query stipulating that a Flora and Fauna Assessment is required;
- Vegetation query X type located in both A & C Wards;

And as such, Council's Natural Environment Unit officers are required to consider the likely potential environmental impacts.

Officer comments

The comments in this referral relate to the following applicable controls and provisions:

- SEPP (Resilience and Hazards) 2021 Coastal Environment Area
- SEPP (Resilience and Hazards) 2021 Littoral Rainforest and Proximity Area
- NSW Biodiversity Conservation Act 2016
- NSW Biodiversity Regulation 2017

A portion of the top of the site is identified on the Department of Climate Change, Energy, the Environment and Water (DCCEEW) Biodiversity Values Map (BV Map). Under the NSW Biodiversity Conservation Act 2016, any removal of native vegetation from within mapped areas will trigger the Biodiversity Offsets Scheme (BOS) and the requirement for a Biodiversity Development Assessment Report (BDAR). However, the submitted plans and documentation indicate that the proposed works are located outside of the BV Map area and therefore will not trigger entry into the BOS. The proposal will not impact native vegetation within the Littoral Rainforest Proximity Area as mapped under the SEPP (Resilience and Hazards) 2021.

The development does not include any terrestrial development or demolition and therefore it is unlikely that the proposal will impact terrestrial flora or fauna. No objections in relation to biodiversity, subject to conditions.

Due to the presence of possible marine biodiversity impacts the application will need to be assessed by the appropriate referral body.

DA2025/0617 Page 1 of 2

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

Recommended Natural Environment Conditions:

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE

No Clearing of Vegetation

Unless otherwise exempt, no vegetation is to be cleared prior to issue of a Construction Certificate.

Details demonstrating compliance are to be submitted to the Certifier prior to issue of Construction Certificate.

Reason: To protect native vegetation.

CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK

Wildlife Protection

If construction activity associated with this development results in injury or displacement of a native mammal, bird, reptile or amphibian, a licensed wildlife rescue and rehabilitation organisation must be contacted for advice.

Reason: To protect native wildlife.

Protection of Habitat Features

All natural landscape features, including any rock outcrops, native vegetation and/or watercourses, are to remain undisturbed during the construction works, except where affected by necessary works detailed on approved plans.

Reason: To protect wildlife habitat.

CONDITIONS WHICH MUST BE COMPLIED WITH PRIOR TO THE ISSUE OF THE OCCUPATION CERTIFICATE

No Weeds Imported On To The Site

No Priority or environmental weeds (as specified in the Northern Beaches Local Weed Management Plan) are to be imported on to the site prior to or during construction works.

Details demonstrating compliance are to be submitted to the Principal Certifier prior to issue of any Occupation Certificate.

Reason: To reduce the risk of site works contributing to spread of Priority and environmental weeds.
