**RE: DA2020/1063 - 2 / 0 Bennett Street CURL CURL NSW 2096**

I am a local resident and I strongly oppose this proposal. I am concerned about increased noise levels in the evening, and I would be very interested to know if any consideration has been given to the effect this lighting & increased activity after dusk in this area which is home to a significant number of native wildlife, some of which are already endangered. The proposal seems to offer no value to local residents and will cost the council a huge amount of money which could be put to making better use of the many existing floodlit sports facilities already in the surrounding area.

I look forward to hearing your response to these comments.

Yours sincerely  
Kate & Scott Hood
