

Natural Environment Referral Response - Riparian

| Application Number: | Mod2020/0472 |
|---------------------------------|---|
| | |
| Date: | 30/09/2020 |
| То: | Nick Keeler |
| Land to be developed (Address): | Lot 218 DP 16212 , 63 Gondola Road NORTH NARRABEEN NSW 2101 |

Reasons for referral

This application seeks consent for the following:

- All Development Applications on land, and located within 40 metres of land, containing a watercourse, or
- All Development Applications on land containing a wetland, or located within 100m of land containing a wetland,
- All Development Applications on land that is mapped as "DCP Map Waterways and Riparian Land".

And as such, Council's Natural Environment Unit officers are required to consider the likely impacts on drainage regimes.

Officer comments

This application, for modifications to approved DA2019/1286, has been assessed against relevant legislation for the protection of waterways. As this application proposes to increase impervious surfaces by more than 50m2 the applicant is required to install a sediment arrestor pit prior to the discharge of stormwater from the property to prevent the migration of sediment offsite. Erosion and sediment controls must be installed in accordance with Managing Urban Stormwater: Soils and Construction (Landcom 2004).

Both the sediment arrestor pit and sediment and erosion controls must be maintained and cleaned on a regular basis. With the applied conditions the proposal is unlikely to cause an adverse impact on the integrity and resilience of the biophysical, hydrological and ecological environment and is therefore recommended for approval subject to conditions.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

Recommended Natural Environment Conditions:

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE

Water Quality Management

MOD2020/0472 Page 1 of 3

The applicant must install a filtration device (such as a sediment control pit or absorption trench) that captures organic matter and coarse sediments prior to discharge of stormwater from the land. All stormwater treatment measures must make provision for convenient and safe regular inspection, periodic cleaning, and maintenance.

Details demonstrating compliance are to be submitted to the Certifying Authority for approval prior to the issue of the Construction Certificate.

Reason: Protection of the receiving environment

CONDITIONS THAT MUST BE ADDRESSED PRIOR TO ANY COMMENCEMENT

Installation and Maintenance of Sediment and Erosion Control

Sediment and erosion controls must be installed in accordance with Landcom's 'Managing Urban Stormwater: Soils and Construction' (2004).

Techniques used for erosion and sediment control on site are to be adequately maintained and monitored at all times, particularly after periods of rain, and shall remain in proper operation until all development activities have been completed and the site is sufficiently stabilised with vegetation.

Reason: To protect the surrounding environment from the effects of sedimentation and erosion from the site.

CONDITIONS WHICH MUST BE COMPLIED WITH PRIOR TO THE ISSUE OF THE OCCUPATION CERTIFICATE

Works as Executed Drawings - Stormwater Treatment Measures

Works as Executed Drawings for the stormwater treatment measures must be prepared in accordance with Council's Guideline for Preparing Works as Executed Data for Council Stormwater Assets.

The drawings shall be submitted to the Principal Certifying Authority prior to the release of the Occupation Certificate.

Reason: Protection of the receiving environment

ON-GOING CONDITIONS THAT MUST BE COMPLIED WITH AT ALL TIMES

Maintenance of Stormwater Treatment Measures

Stormwater treatment measures must be maintained at all times in accordance with manufacturer's specifications and as necessary to achieve the required stormwater quality targets for the development.

Northern Beaches Council reserves the right to enter the property and carry out appropriate

MOD2020/0472 Page 2 of 3

maintenance of the device at the cost of the property owner.

Reason: Protection of the receiving environment
