Reason for application and outline of proposed work

The paperbark tree at the front of our property has massive roots that has burst our water pipes twice. Recently the pipe burst and caused significant water rushing into neighbours conduit and electricity box. The roots are also very close to gas pipes and valve (see photo of where other pipe was burst - right next to gas. Two visits by plumber has also been very expensive and will continue. The tree is also very close to garage approx. 2 metres and is also at danger of falling due to shallow root system sitting on top of sandstone rock visible from neighbours driveway.
