Subject: Information on DA2021/1805

Good afternoon,

We live at 5/1 Eastbank Avenue, Collaroy and our apartment faces west, therefore adjoining the eastern boundary of 4 Alexander Street, the owners of which have submitted development application DA2021/1805.

The development application is for a 3 storey seniors housing complex.

We request that the developer supply a shading diagram as we receive only 2 hours of direct sunlight into our living room for a great portion of the year and any further loss of sunlight would severely affect our living standards.

Could you please advise if a shading diagram has been submitted in the application.

Regards
Diana and Marc Sier
