RE: DA2020/1167 - 9 Francis Street DEE WHY NSW 2099

I'm further concerned that the drama class wants to run classes in the roof space. The noise will greatly impact our quality of living. Placing this large rooftop meeting place for people to gather will cause great disruption to our neighbourhood.

We hear the yelling and screaming from the drama class currently even when inside current building. Been on top will make our lives a living hell. We bought this house for an occasional use had and understanding of basic church runnings.

Not the proposed concert hall, entertainment stadium, rooftop party and function area.

This is not the place for loud concerts and events on a daily and nightly basis.

There are many hundreds on people living in the surrounding radius and we need help to minimise having a concert hall, mega church and entertainment venue that will cause stress, noise, annoyances with parking and quality of life.

I'm all for development of the site but only with consideration of surrounding homes and people's Australian dream homes. We don't have much but we love it. Please don't block the sun and stop our dreams of living such a wonderful neighborhood.

With adjustments and considerations for the neighborhood. The upgrades are possible but with reduced size and exterior gathering places and more attention to neighbors privacy needs.

Getting personal recommendations from people that want to simply use the upgraded concert hall and entertainment space and don't live next to it is insulting.

I'm sure if they had someone build this in there back fences at there homes their opinion wouldn't be very different.

Just because they want it shouldn't mean we the neighbourhood should suffer after they drive back to there quite the lined streets in suburbs far away.

Thankyou for your considerations and fairness
