RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

I believe the right hand turn at traffic lights, leading directly from the shopping centre onto Forestway has been rejected and current traffic modelling shows that there will be a significant increase in traffic travelling south and north along Grace Avenue towards Altona Avenue. This will undoubtedly increase traffic along the back streets including Deakin Street, where we live .

In the 22 years that we have lived in this street, the traffic has become increasing worse year by year and since the roadworks have commenced, some days it's almost impossible to drive out of the driveway due to traffic backed up because of slow moving traffic along Warringah Road and with the new developments this will be a daily issue. Street parking of people catching public transport will also be on the rise, causing all sorts of problems in the back streets.

With the recently built low income boarding house on cnr of Warringah Road and Altona Avenue which has insufficient carparking spaces, it is already causing a problem with traffic flow from Grace Avenue due to parked cars outside and along Altona Avenue. Walkom Street is also a carpark during the working day for public transport users and it's only a matter of time before the other back streets will be used as a carpark.

Another issue which seems to be on the rise is house break-ins in the area.

Some form of traffic control is required to keep the back streets safe, relatively quiet, clean and pleasant to live in.

Thank you for your attention in this matter.
