**RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099**

I object to this submission for the following reasons:

Health Impacts. The International Agency for Research on Cancer (IARC) - part of the World Health Organisation (WHO) rates Radio Frequency/EMF as possible class 2B carcinogens. I have electrical hypersensitivity and experience sleep disturbances, fatigue, difficulty concentrating, hearing disruptions and skin problems. All symptoms which recent studies refer to as electrical hyper-sensitivity. My partner has ongoing cancer concerns.  
Visual Impact: These towers are visual pollution in such a beautiful location where members of the public enjoy recreational activities and the Curl Curl Lagoon Friends work to clean up and defend/protect the natural environment for future generations to enjoy.

Telstra/Vodafone and Optus all appear to have no issues with coverage. I am with Optus and I have no issues.

Thank you for receiving my submission.
