

MARGOT BLUES

CONSULTING ARBORIST

21 February 2021

Mr & Mrs A Jackson
12 Horning Pde
MANLY VALE NSW 2093

Dear Andrew and Lisa

Arborist Reporting for DA purposes

At your request, a site visit occurred Saturday 20 February 2021 to inspect two trees within the property for Development Application reporting requirements.

T1: *Citharexylum spinosum* (Fiddlewood) is listed on the "Exempt Species List" and is within 2 metres of the neighbouring property No 10 Horning Pde Manly Vale - Northern Beaches Council's Website (published). <https://www.northernbeaches.nsw.gov.au/planning-development/tree-management/private-land accessed 21/2/2021>. See photos 1 & 2.

T2: *Camellia sasanqua* (Camellia) located in the front garden is less than 5 metres in height; therefore exempt. See photo 3.

As both trees are exempt, a permit for their removal is not required. Accordingly, both trees do not pose a constraint upon the development and a formal Arboricultural Impact Assessment Report for is not required in this instance.

Both trees are identified on the supplied survey – see following.

Should you require further information, please don't hesitate to contact me.

Kind regards

Margot Blues
