Subject: Da 2018/2017 lot87 DP 1729 and lot. 2 DP 589654

Yesterday's extreme weather had emergency vehicles frequently going up and down Sydney Rd. With the sheer size and scale of this proposed development how does council think that the traffic that already exists is going to cope with excavators and trucks stopping and starting traffic on a main arterial rd to Manly? Residents that have contacted rds the and maritime seem to have concerns dismissed. Is the council doing an independent traffic report on this matter?
