

Frenchs Forest Cemetery Proposed Chapel Works and Parking Upgrades

The current proposal for the new Chapel and Amenities building alongside parking arrangement upgrades has been located in its current position to align with objectives outlined within the current Frenchs Forest Draft master planning document. Reasons are outlined below:

- The Chapel has been located adjacent the existing facilities at Frenchs Forest within close proximity to existing car parking creating equitable access and movement between the two facilities.
- Creates a new arrival experience with the Chapel being visible from the main entry and Hakea Avenue
- Located in flat area which was previously used for maintenance sheds, minimising impact to the existing vegetation and relying on existing services that are established within the vicinity
- The chapel has also been located away from Burial sites which allows the areas to both function at the same time. Allowing services to happen while patrons can still access the burial sites throughout the cemetery land
