RE: Mod2022/0090 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

We would like to object to the proposed change to Condition10 (ii) of the development permit which requires rehabilitation planting for the proposed Optus facility.

We want the council to ensure that Condition 10 (ii) of the approval is met. That is, we want the council to require planting around the infrastructure to minimise the visual impact.

This is an important condition for the community, as it helps reduce the visual impact of a structure that many did not want there in the first place.

We would also like to support the already submitted request, that there is greater transparency of meeting notes from January 25.

Does council monitor the safety of the towers on a regular basis to ensure they have not allowed an infrastructure that negatively impacts on those in the local community?

This would be a valuable service and would provide reassurance for many, especially if the council is convinced there are no problems. It is a contentious issue.
