Subject: DA2021/2567

Hi Anne-Marie, I sent this last week but have not heard back and cannot see it added to submissions.

I wish to lodge further objection to DA2021/2567.

I have just received notification of a complying development application to demolish 35 consul road brookvale.

St Augustine's bought this property last year. In this current application they have said that they will be leaving this address as a residential property, as they have no plans for it at this stage.

But as you will see with the attached, they are knocking it down.

I spoke with the applicant from APG and they said it was being knocked down in inline with the school's future plans for this site. The site has not be proposed to change to educational establishment.

This leaving me confused as to what is going on is there a master plan or not..

They have an current DA currently being assed which saysone thing..

A complying developer doing another.

When speaking with APG the applicant who told me this saying they are moving forward with these future plans in mind.

Yet as a resident when I asked what these plans where I was asked did I object previously I said yes and they hung up the phone..

No very good communication..

This needs added to the current application of more student numbers..
