RE: DA2020/1063 - 2 / 0 Bennett Street CURL CURL NSW 2096

I am a local 15 year old resident who plays sport but opposes this proposal for new lighting. I live directly opposite the proposed location for the lighting and am deeply concerned for the wellbeing of our community, environment and endangered wildlife. the residents will be overwhelmed with light pollution and noise pollution, not to mention the horrendous traffic and parking conditions this will bring into our already overwhelmed streets. One of the main issues being Freshwater High School using our streets like a car park and Saturday and Sunday sport using our street like a car park, often parking illegally and blocking driveways. myself and other kids in this area see no need or benefits of this proposal as we already have multiple training grounds with full lighting in the area.

p.s if you read through these submissions you will notice how the people living in the area are against it while people who don't live in this area are for this plan to go ahead.
