RE: DA2021/2173 - 394 Barrenjoey Road NEWPORT NSW 2106

Toilets/change rooms: provide private showers and change cubicles - people are much more comfortable showering/changing in private. It's not about being prudish - it's about providing for people's actual needs. If someone prefers to be observed while showering/changing, then they could always leave their cubicle door open!

The layout of the Men's public toilet is unfortunate - upon entering the toilet there is the prospect of being immediately presented with the view of a naked man - again, not being prudish, but probably an uncomfortable prospect for both parties. Please also consider that children use these facilities as well.

Providing change/shower cubicles will not require changing the floor plan - so should be easy to achieve.
