Instructions

The model can be used on a PC, via a web link. It works well using Chrome as a browser (other browsers may have issues). You can move around the model using your mouse or the arrow keys and the instructions at the bottom of the screen. There are 2 modes for moving, Walkmode and Flymode (shown on the top right hand corner of the screen). You can use the space bar to change between these modes. In walkmode the viewer remains on the ground and can only pass through doors or around objects. You can change the time of day and sun angles by holding down the right mouse button and shift and moving the mouse right or left.
