RE: DA2020/1162 - 27 Bellevue Avenue AVALON BEACH NSW 2107

I am concerned about the number of mature native trees that are earmarked for removal in relation to this development. These trees not only provide habitat for native bird species in the area, they also provide a filter against the western sun which is significant in the Summer months. While I appreciate that alternate vegetation has been included in this development the loss of these mature native trees is irreversible .
