

1. DEMOLITION

Demolition works to be carried out in accordance with the requirements of A2601-2001 The Demolition of Structures. Also in compliance with work cover authority of NSW requirements, including but not limited to:

- Protection of site workers and the general public
- Asbestos handling and disposal where applicable

2. PEST CONTROL

Termite protection to be provided in accordance with NCC 3.1.4 and AS 3660.1

3. TIMBER FRAMING

All timber framing shall comply with AS1684

4. SMOKE ALARMS S

Hard wired smoke alarms to comply with NCC 3.7.5 and AS3786-1993

5. FIRE SAFTY

An external wall of Class 1 buildings and any openings in that wall must comply with NCC 3.7.2 if the wall is less than 900mm from an allotment boundary
Eaves within 900mm of allotment boundries are to be constructed of non-combustible materials. eaves must not be within 450mm of allotment boundaries as required by part 3.7.1 of BCA

5. BALUSTRADES

In accordance with NCC 3.9.2 - balustrades to be at least 1m above the FFL of balconies and landings , and no less rhan 865mm above nosing line of stairs ; incorporate openings no larger than 125mm and where the fall of >4m, to have no climbable members between 150-760mm
Balustrades to comply with AS1170

6. WATERPROOFING

Waterproofing shall be carried out in accordance with NCC 3.8.1 and AS4654-2012

7. SEDIMENT CONTROL

Sediment & Erosion control are to be installed and maintained during the life of the project

8. SOLID FUEL BURNER

Solid fuel burner and flue system should comply with AS/NZS 2918:2018

9. POOL

Pool overflow to be connected to existing Sewer System

10. POOL FENCING

Pool fencing to be designed, located and maintained in accordance with the swimming pools act 1992, Regulation Pools Act 1992, Regulation and Australian Standard 1926.1 & comply with BCA Vol.2, Housing Provisions, Part 3.9.3 and AS1926.1.
The min H of pool fence balustrade is 1200mm and openings not grater than 100mm.

SILT FENCE DETAIL & NOTES:

1. Silt fences should be installed on a site as early as possible, ideally before excavation or other soil disturbance begins
2. Install a silt fence down-slope from the construction area, always along the contour (curve) of the slope you are protecting – don't install in straight lines
3. Significant downward slopes should use the curved installation method
4. Stockpiles of soil and building materials must be contained by a silt fence
5. Leave the silt fence in place until vegetation is established, or sediment is stabilised
6. Silt fencing requires frequent inspections, particularly after each runoff event (storm, rainfall etc.), to check for damage or clogging of the fence by silt and debris
7. Silt fences are best used for sites where the soil disturbance area is up to 0.5 of a hectare

Do not scale from plans. All dimensions and levels shown on plan are subject to confirmation on site.
