RE: REV2021/0006 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

Objection to DA-REV2021/0006

Saving Sydneys Trees is a Community Association with a FaceBook Following of well over 9.7 Thousand.

We write to Strongly Object to this DA and Development that encroaches further into Public Green Space, Canopy, Vegetation and Habitat.

Clearly not wanted by Council, Local Planning Panel (Twice) and Community and violates the 2014 Plan of Management for MWMSP which encourages surrounding Crown Land to be added to the Park NOT developed.

The presentation of 24 expensive and Private apartments upon this land is abhorrent in its violation of The General Public Best Long Term Interest and any pretense of Fairness. It is Riparian land above a Category A Creek. ANY Pollution of any and all waterways presents great detriment to this Special area and the habitat and species within.

The implications of All of Landscape maintenance in Fire Breaks this DA brings to other canopy and habitat adjacent at a time of recent Flooding and the Premiers Call for Greening Sydney finds this DA Out of all understanding.

This further depletion of Canopy and Carbon sequestration interference is in direct opposition to AUSTRALIAS' Commitment to the Paris Agreement (This is binding on ALL LEVELS of Government).

We view this DA as detrimental to the Long Term Best Interests of the Public and Environment.

We call for this DA-REV2021/0006 to be REJECTED

Most Sincerely

Margaret Hogg
