

Appendix One - Clause 4.6 *Exceptions to Development Standards – Floor Space Ratio*

Clause 4.6 of the Manly Local Environmental Plan 2013 (MLEP 2013) permits departures from development standards in certain circumstances. In this case, it is necessary to consider if compliance with the development standard is consistent with the aims of the policy and, in particular, does compliance with the development standard tend to hinder the attainment of the objects specified in section 1.3 of the *Environmental Planning and Assessment Act 1979* (EP&A Act) *being:*

- (a) to promote the social and economic welfare of the community and a better environment by the proper management, development and conservation of the State's natural and other resources,*
- (b) to facilitate ecologically sustainable development by integrating relevant economic, environmental and social considerations in decision-making about environmental planning and assessment,*
- (c) to promote the orderly and economic use and development of land,*
- (d) to promote the delivery and maintenance of affordable housing,*
- (e) to protect the environment, including the conservation of threatened and other species of native animals and plants, ecological communities and their habitats,*
- (f) to promote the sustainable management of built and cultural heritage (including Aboriginal cultural heritage),*
- (g) to promote good design and amenity of the built environment,*
- (h) to promote the proper construction and maintenance of buildings, including the protection of the health and safety of their occupants,*
- (i) to promote the sharing of the responsibility for environmental planning and assessment between the different levels of government in the State,*
- (j) to provide increased opportunity for community participation in environmental planning and assessment.*

The aims and objectives of Manly LEP 2013 Clause 4.6 are as follows:

(a) to provide an appropriate degree of flexibility in applying certain development standards to particular development,

(b) to achieve better outcomes for and from development by allowing flexibility in particular circumstances.

Under Clause 4.6(3) and (4) of the MLEP 2013, consent for a development that contravenes a development standard must not be granted unless the consent authority is satisfied that:

(3)(a) compliance with the development standard is unreasonable or unnecessary in the circumstances of the case, and

(3)(b) there are sufficient environmental planning grounds to justify contravening the development standard.

(4)(a)(ii) the proposed development will be in the public interest because it is consistent with the objectives of the particular standard and the objectives for development within the zone in which the development is proposed to be carried out,

These matters, along with case law judgements from the NSW Land and Environment Court, are addressed below.

1. Environmental Planning Instrument Details (Manly LEP 2013)

1.1 What is the name of the environmental planning instrument that applies to the land?

Manly Local Environmental Plan 2013

1.2 What is the zoning of the land?

R1 – General Residential

1.3 What are the objectives of the zone?

- *To provide for the housing needs of the community.*
- *To provide for a variety of housing types and densities.*
- *To enable other land uses that provide facilities or services to meet the day to day needs of residents.*

1.4 What is the development standard being varied?

Cl 4.4 – Floor Space Ratio

1.5 Under what clause is the development standard listed in the environmental planning instrument?

Cl 4.4 of the Manly Local Environmental Plan 2013

1.6 What are the objectives of the development standard?

(1) The objectives of this clause are as follows:

- (a) to ensure the bulk and scale of development is consistent with the existing and desired streetscape character,*
- (b) to control building density and bulk in relation to a site area to ensure that development does not obscure important landscape and townscape features,*
- (c) to maintain an appropriate visual relationship between new development and the existing character and landscape of the area,*
- (d) to minimise adverse environmental impacts on the use or enjoyment of adjoining land and the public domain,*
- (e) to provide for the viability of business zones and encourage the development, expansion and diversity of business activities that will contribute to economic growth, the retention of local services and employment opportunities in local centres.*

1.7 What is the numeric value of the development standard in the environmental planning instrument?

The numeric value of the FSR development standard applicable to the subject site is 0.6:1, this equates to a maximum floor area of 167.24m² for the site area of 278.74m².

1.8 What is proposed numeric value of the development standard in your development application?

The development proposes a maximum floor area of 200.7m² or 0.72:1.

1.9 What is the percentage variation (between your proposal and the environmental planning instrument)?

The percentage variation sought is 20% or 33.46m²

2. NSW Land and Environment Court Case Law

Several key Land and Environment Court (NSW LEC) judgements have refined the manner in which variations to development standards are required to be approached. The key findings and direction of each of these matters are outlined in the following discussion.

2.1 *Wehbe v Pittwater* [2007] NSW LEC 827

The decision of Justice Preston in *Wehbe v Pittwater* [2007] NSW LEC 827, (expanded on the findings in *Winten v North Sydney Council*), identified 5 ways in which the applicant might establish that compliance with a development standard is unreasonable or unnecessary. It was not suggested that the five ways were the only ways that a development standard could be shown to be unreasonable or unnecessary.

The five ways outlined in *Wehbe* include:

1. *The objectives of the standard are achieved notwithstanding non-compliance with the standard (First Way).*
2. *The underlying objective or purpose of the standard is not relevant to the development and therefore compliance is unnecessary (Second Way).*
3. *The underlying object or purpose would be defeated or thwarted if compliance was required and therefore compliance is unreasonable (Third Way).*
4. *The development standard has been virtually abandoned or destroyed by the Council's own actions in granting consents departing from the standard and hence compliance with the standard is unnecessary and unreasonable (Fourth Way).*
5. *The zoning of the particular land is unreasonable or inappropriate so that a development standard appropriate for that zoning is also unreasonable and unnecessary as it applies to the land and compliance with the standard would be unreasonable or unnecessary. That is, the particular parcel of land should not have been included in the particular zone (Fifth Way).*

In the Micaul decision Preston CJ confirmed that the requirements mandated by SEPP 1 (as discussed in *Wehbe*) are only relevant in demonstrating that compliance with a development standard is unreasonable or unnecessary for the purpose of Clause 4.6(3)(a).

2.2 *Four2Five Pty Ltd v Ashfield Council* [2015] NSW LEC

In the matter of *Four2Five Pty Ltd v Ashfield Council* [2015] NSW LEC, initially heard by Commissioner Pearson, upheld on appeal by Justice Pain, it was found that an application under Clause 4.6 to vary a development standard must go beyond the five (5) part test of *Wehbe v Pittwater* [2007] NSW LEC 827 and demonstrate the following:

1. Compliance with the particular requirements of Clause 4.6, with particular regard to the provisions of subclauses (3) and (4) of the LEP;
2. That there are sufficient environment planning grounds, particular to the circumstances of the proposed development (as opposed to general planning grounds that may apply to any similar development occurring on the site or within its vicinity);
3. That maintenance of the development standard is unreasonable and unnecessary on the basis of planning merit that goes beyond the consideration of consistency with the objectives of the development standard and/or the land use zone in which the site occurs;
4. All three elements of clause 4.6 have to be met and it is best to have different reasons for each but it is not essential.

3 Randwick City Council v Micaul Holdings Pty Ltd [2016] NSWLEC 7

In *Randwick City Council v Micaul Holdings*, the Court allowed a departure from development standards, provided the processes required by clause 4.6 are followed, a consent authority has a broad discretion as to whether to allow a departure from development standards under clause 4.6, even where the variation is not justified for site or development specific reasons.

Preston CJ noted that *the Commissioner did not have to be satisfied directly that compliance with each development standard was unreasonable or unnecessary in the circumstances of the case, but only indirectly by being satisfied that the appellant's written request had adequately addressed the matter in clause 4.6(3)(a) that compliance with each development standard was unreasonable or unnecessary.*

4 Zhang v City of Ryde

Commissioner Brown reiterated that clause 4.6 imposes three preconditions which must be satisfied before the application could be approved:

1. The consent authority must be satisfied that the proposed development will be consistent with the objectives of the zone;
2. The consent authority must be satisfied that the proposed development will be consistent with the objects of the standard which is not met; and
3. The consent authority must be satisfied that the written request demonstrates that compliance with the development standard is unreasonable or unnecessary in the circumstances and there are sufficient environmental planning grounds to justify contravening the development standard.

It is only if all of these conditions are met that consent can be granted to the application, subject to an assessment of the merits of the application.

The Commissioner applied the now familiar approach to determining consistency with zone

objectives by considering whether the development was antipathetic to the objectives.

In contrast to four2five, the reasons relied on to justify the departure from the standards in this case were not necessarily site specific.

5. Action Pty Ltd v Woollahra Municipal Council [2018]

In Action Pty Ltd v Woollahra Municipal Council, the court demonstrated the correct approach to the consideration of clause 4.6 requests, including that the clause does not require that a development that contravenes a development standard, must have a neutral or better environmental planning outcome than one that does not.

3. Consideration

The following section addresses the provisions of clause 4.6 of the MLEP 2013 together with principles established in the NSW Land and Environment Court Case Law outlined above.

Clause 4.6(3)(A) - Is compliance with the development standard unreasonable or unnecessary in the circumstances of the case (and is a development which complies with the development standard unreasonable or unnecessary in the circumstances of the case)?

In order to demonstrate that compliance with the development standard is unreasonable or unnecessary, in the circumstances of the case, the Five (5) Part Test established in *Winten v North Sydney Council* and expanded by Justice Preston in *Wehbe v Pittwater* [2007] NSW LEC 827 is considered:

The five ways outlined in *Wehbe* include:

3.1 Five (5) Part Test - *Wehbe v Pittwater*

1. *The objectives of the standard are achieved notwithstanding non-compliance with the standard (First Way).*

The objectives of the standard are:

(a) to ensure the bulk and scale of development is consistent with the existing and desired streetscape character,

Comment

The proposed development is a minor lower ground floor level addition to the rear of the dwelling and is not visible from Arthur Street. The bulk and scale is consistent with the existing dwelling and neighbouring dwellings.

The proposed variation is 20% or 33.46m² and is considered reasonable given the proposed development does not present with excessive bulk and is of a similar or lesser scale than adjoining properties. It is considered this objective is met, despite the numerical variation.

(b) to control building density and bulk in relation to a site area to ensure that development does not obscure important landscape and townscape features,

Comment

The proposed built form, setbacks and massing are considered to be consistent with other dwellings in the locality and remain consistent with the existing dwelling. The proposal is located beneath the existing ground floor level and at the rear of the dwelling. It is not visible from the street and will not obscure any important landscape and townscape

features. The proposal also easily complies with the relevant DCP requirements for total open space and landscaped area.

A site visit has been undertaken and it is considered the development will not result in any view loss impacts.

It is therefore considered this objective is met, despite the numerical variation.

(c) to maintain an appropriate visual relationship between new development and the existing character and landscape of the area,

Comment

The proposed variation does not require the removal or pruning of trees on the subject site or on adjoining properties. The proposed works are located on the portion of the lot that is already disturbed and it is considered the built form is consistent with new development in the locality and the existing dwelling. In this regard, the underlying intent of this objective has been satisfied despite the numerical departure.

(d) to minimise adverse environmental impacts on the use or enjoyment of adjoining land and the public domain,

Comment

The proposed variation to floor space ratio does not result in any unreasonable environmental impacts to the amenity of adjoining dwellings. Compliant levels of solar access are maintained despite the proposed variation and there will be no impact on views, visual privacy or acoustic privacy. In this regard, the underlying intent of this objective has been satisfied despite the numerical departure.

(e) to provide for the viability of business zones and encourage the development, expansion and diversity of business activities that will contribute to economic growth, the retention of local services and employment opportunities in local centres.

Comment

Not relevant as the subject site is no located in a business zone.

2. *The underlying objective or purpose of the standard is not relevant to the development and therefore compliance is unnecessary (Second Way).*

This exception to development standards request does not rely on this reason.

3. *The underlying object or purpose would be defeated or thwarted if compliance was required and therefore compliance is unreasonable (Third Way).*

This exception to development standards request does not rely on this reason.

4. *The development standard has been virtually abandoned or destroyed by the Council's own actions in granting consents departing from the standard and hence compliance with the standard is unnecessary and unreasonable (Fourth Way).*

This exception to development standards request does not rely on this reason.

5. *The zoning of the particular land is unreasonable or inappropriate so that a development standard appropriate for that zoning is also unreasonable and unnecessary as it applies to the land and compliance with the standard would be unreasonable or unnecessary. That is, the particular parcel of land should not have been included in the particular zone (Fifth Way).*

This exception to development standards request does not rely on this reason.

This clause 4.6 variation request establishes that compliance with the development standard is unreasonable or unnecessary in the circumstances of the proposed development because the objectives of the standard are achieved and accordingly justifies the variation to the floor space ratio control pursuant to the First Way outlined in Wehbe.

Thus, it is considered that compliance with Clause 4.6(3)(a) is satisfied.

3.2 Clause 4.6(3)(B) – Are there sufficient environmental planning grounds to justify contravening the development standard?

There are sufficient grounds to permit the variation of the development standard. The development has been considered below with particular reference to the Objects of the Environmental Planning and Assessment Act 1979, which are accepted as the best gauge of *environmental planning grounds*. In particular:

Context

- The area surrounding the subject site is characterised by large two storey detached residential dwellings on small residential lots, with non-compliant floor space ratios.
- The proposed dwelling has been designed to remain consistent with the character of the existing dwelling and the area, despite the minor variation to FSR, through design, architectural features and complimentary materials and colour choices.

Figure 1. No. 6 & 8 Arthur Street – the adjoining properties to the east.

Figure 2. No. 12 Arthur Street – the adjoining property to the west (recently redeveloped).

Figure 3. No. 12 Arthur Street – the adjoining property to the west (partial nil setback to boundary).

- Variation to the Manly LEP 2013 Cl. 4.4 FSR, control has been the subject of recent precedent for the following developments:
 - 2020/0254 12 Arthur Street Fairlight, FSR Variation of 18.8%
 - 2020/0936 11 Bareena Drive Balgowlah Heights, FSR Variation of 11.5%
 - 2020/0872 65 Bower Street Manly, FSR variation of 2%
 - 2020/0979 4 Kangaroo Street Manly, FSR Variation of 9.2%
 - 2020/1316 1 Peacock Street Seaforth, FSR Variation of 4.44%
- The setting and context with similar FSR variations recently approved, demonstrates that a varied FSR is reasonable and that it is consistent with clause 1.3(c) and (d).

Future Development

- The proposed development will allow for the provision of a larger office space,
- This represents an efficient use of an existing developed site, with all services readily available.
- The built form proposed is consistent with other buildings in the locality,
- Given the site context, the proposed variation is reasonable at 33.46m² or 20% and does not result in any unreasonable impacts to neighbouring properties.
- The proposed works will not hinder any future development of the lot.
- The alterations proposed demonstrate fulfillment of clause 1.3(a), (b), (c) and (g).

Consistent with Zone Objectives

- The extent of the variation is considered to be in the public interest, as the proposal remains consistent with the objectives of the zone, allowing for additional residential floor space in a residential zone, with a bulk and scale consistent with the locality. Compliance with the FSR standard based on this would be unreasonable, with clause 1.3(c) demonstrated as fulfilled.

Natural Environment

- The proposed development allows for the current and future housing needs of the residents to be met, without developing a greenfield site, representing an efficient use of existing developed land.
- The development does not require the removal of any significant native vegetation and complies with Council DCP landscape area controls.
- The new dwelling proposed, allows for environmental impacts to be minimised, by locating works on an already disturbed residential lot.
- The natural environment is unaffected by the departure to the development standard and it would be unreasonable for the development to be refused on this basis with Cl 1.3(b) satisfied.

Social and Economic Welfare

- The variation to the FSR will have a positive social impact, as it will allow the housing needs of the residents to be met in their current local community. It provides the opportunity to work from home in a dedicated home office and utilises existing services, satisfying Cl1.3(b). Accordingly, refusal of the development based on this reason would be unreasonable.

Appropriate Environmental Planning Outcome

- The development proposed is not an overdevelopment of the site and satisfies the objectives of the zone and the development standard as is detailed earlier in the report.

The variation to the FSR and the discussion above reflects the unique circumstances for the subject site and proposed development. The proposed development will not present with excessive bulk from the public domain and there is recent precedent of similar variations being accepted by Council.

By supporting this variation, in its current form, it is considered that an appropriate degree of flexibility be applied, which results in a reasonable built form, consistent with developments within the locality.

The sufficient environmental planning grounds stipulated above demonstrate that the proposal aligns with the relevant objects of the EP&A Act i.e. the development is an orderly and economic and development of the land, notwithstanding the FSR variation.

3.3 Clause 4.6(4)(A)(ii) – Will the proposed development be in the public interest because it is consistent with the objectives of the particular standard and objectives for development within the zone which the development is proposed to be carried out.

The proposed development is consistent with the objectives of the standard (see Cl 4.6(3)(A)). An assessment of consistency with the objectives of the Zone is provided below:

Zone – R1 General Residential

Objectives of zone

- *To provide for the housing needs of the community*

Consistent. The proposed works will allow the current and future housing needs of the residents to be met in their current local community. It provides the opportunity to work from home in a dedicated home office.

- *To provide for a variety of housing types and densities.*

Not relevant. The proposal is for an addition to an existing residential dwelling.

- *To enable other land uses that provide facilities or services to meet the day to day needs of residents*

Not relevant.

The proposed development is not contrary to the public interest, because it is consistent with the objectives of the standard (see Cl 4.6(3)(A)) and objectives for development within the zone.

Clause 4.6(5)(a) whether contravention of the development standard raises any matter of significance for State or regional environmental planning,

The non-compliance will not raise any matter of State or Regional Significance.

Clause 4.6(5)(b) the public benefit of maintaining the development standard,

The proposed development is not contrary to the public interest, accordingly there can be no quantifiable or perceived public benefit in maintaining the standard.

Clause 4.6(5)(c) any other matters required to be taken into consideration by the Secretary before granting concurrence

How would strict compliance hinder the attainment of the objects specified in Section 1.3 of the Act.

Strict compliance with the standard would hinder the attainment of the objects specified in section 1.3 of the Act

(a) to promote the social and economic welfare of the community and a better environment by the proper management, development and conservation of the State's natural and other resources,

(b) to facilitate ecologically sustainable development by integrating relevant economic, environmental and social considerations in decision-making about environmental planning and assessment,

(c) to promote the orderly and economic use and development of land,

(d) to promote the delivery and maintenance of affordable housing,

(e) to protect the environment, including the conservation of threatened and other species of native animals and plants, ecological communities and their habitats,

(f) to promote the sustainable management of built and cultural heritage (including Aboriginal cultural heritage),

(g) to promote good design and amenity of the built environment,

(h) to promote the proper construction and maintenance of buildings, including the protection of the health and safety of their occupants,

(i) to promote the sharing of the responsibility for environmental planning and assessment between the different levels of government in the State,

(j) to provide increased opportunity for community participation in environmental planning and assessment.

Strict numerical compliance with the 0.6:1 FSR development standard would hinder the development for the purpose of *promoting the orderly and economic use and development of land, promoting good design and amenity of the built environment and promoting the proper construction and maintenance of buildings, including the protection of the health and safety of their occupants.*

The proposed development for a lower ground floor level rear addition, on land zoned R1 – General Residential is appropriate and reasonable for the following reasons:

- There is recent precedent for similar variations to Cl 4.4 FSR of the Manly LEP 2013 being accepted by Council,
- The proposed development does not present with excessive bulk and is of a consistent scale to surrounding properties. The proposal will not result in any unreasonable impacts.
- The works proposed will allow the housing needs of the residents to be met, including an opportunity to work from home, in their current community,
- The objectives of the R1 zone can be met despite the numerical variation.

Strict numerical compliance is considered to be unnecessary and unreasonable given that the proposed variation sought is consistent with the underlying objectives of the control despite the numerical variation, of which have been reasonably satisfied under the provisions of Clause 4.6. The statement sufficiently demonstrates that compliance with the development standard is both unreasonable and unnecessary in this instance.

The sufficient environmental planning grounds stipulated within this request, demonstrate that the proposal aligns with the relevant objects of the EP&A Act i.e. the development is an orderly and economic and development of the land, notwithstanding the FSR variation.

The proposed variation satisfies the objectives of the zone, underlying intent of Clause 4.6 and Clause 4.4, and therefore the merits of the proposed variation are considered to be worthy of approval.
