

# DEVELOPMENT APPLICATION ASSESSMENT REPORT

Application Number:	DA2022/2035
Responsible Officer:	Grace Facer
Land to be developed (Address):	Lot 96 DP 6937, 50 Florida Road PALM BEACH NSW 2108
Proposed Development:	Construction of a swimming pool, cabana, decks and associated landscaping
Zoning:	C4 Environmental Living
Development Permissible:	Yes
Existing Use Rights:	No
Consent Authority:	Northern Beaches Council
Land and Environment Court Action:	No
Owner:	Cloudgard NO 203 Pty Ltd
Applicant:	True Form Landscape Architecture

Application Lodged:	29/11/2022	
Integrated Development:	No	
Designated Development:	No	
State Reporting Category:	Residential - Alterations and additions	
Notified:	05/12/2022 to 19/12/2022	
Advertised:	Not Advertised	
Submissions Received:	0	
Clause 4.6 Variation:	Nil	
Recommendation:	Approval	

Estimated Cost of Works:	\$ 407,000.00

# PROPOSED DEVELOPMENT IN DETAIL

The proposed development comprises of the following works in the rear yard:

- New inground swimming pool
- Construction of a covered deck area
- Construction of an uncovered deck area

# ASSESSMENT INTRODUCTION

The application has been assessed in accordance with the requirements of the Environmental Planning and Assessment Act 1979 and the associated Regulations. In this regard:

- An assessment report and recommendation has been prepared (the subject of this report) taking into account all relevant provisions of the Environmental Planning and Assessment Act 1979, and the associated regulations;
- A site inspection was conducted and consideration has been given to the impacts of the development upon the subject site and adjoining, surrounding and nearby properties;
- Notification to adjoining and surrounding properties, advertisement (where required) and referral to relevant internal and external bodies in accordance with the Act, Regulations and relevant Development Control Plan;
- A review and consideration of all submissions made by the public and community interest groups in relation to the application;
- A review and consideration of all documentation provided with the application (up to the time of determination);
- A review and consideration of all referral comments provided by the relevant Council Officers, State Government Authorities/Agencies and Federal Government Authorities/Agencies on the proposal.

# SUMMARY OF ASSESSMENT ISSUES

Pittwater Local Environmental Plan 2014 - Zone C4 Environmental Living Pittwater Local Environmental Plan 2014 - 7.7 Geotechnical hazards

Pittwater 21 Development Control Plan - D12.6 Side and rear building line

Pittwater 21 Development Control Plan - D12.10 Landscaped Area - Environmentally Sensitive Land

# SITE DESCRIPTION

Property Description:	Lot 96 DP 6937, 50 Florida Road PALM BEACH NSW 2108
Detailed Site Description:	The subject site consists of one (1) allotment located on the northern side of Florida Road.
	The site is irregular in shape with a frontage of 46.835m along Florida Road and a maximum depth of 36.63m. The site has a surveyed area of 1002.2m².
	The site is located within the C4 Environmental Living zone from the PLEP 2014 and accommodates a two storey dwelling house with a timber deck and cabana in the rear yard.
	The site has a north-eastern slope aspect with an average graident across the site of ~15 degrees.
	The site contains lawn areas, small and medium sized shrubs and trees. There are no details of any threatened species on the subject site.
	Detailed Description of Adjoining/Surrounding Development
	Adjoining and surrounding development is characterised by one and two storey dwelling houses of varying architectural

styles and designs. Palm Beach Surf Life Saving Club adjoins the property's rear boundary to the north-east.

# SITE HISTORY

The land has been used for residential purposes for an extended period of time. A search of Council's records has revealed the following relevant history:

#### N1109/00

Development Application for alterations and additions to the existing dwelling Approved on 27 December 2000

# **ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979 (EPAA)**

The relevant matters for consideration under the Environmental Planning and Assessment Act, 1979, are:

Section 4.15 Matters for Consideration	Comments
Section 4.15 (1) (a)(i) – Provisions of any environmental planning instrument	See discussion on "Environmental Planning Instruments" in this report.
Section 4.15 (1) (a)(ii) – Provisions of any draft environmental planning instrument	There are no current draft environmental planning instruments.
Section 4.15 (1) (a)(iii) – Provisions of any development control plan	Pittwater 21 Development Control Plan applies to this proposal.
Section 4.15 (1) (a)(iiia) – Provisions of any planning agreement	None applicable.
Section 4.15 (1) (a)(iv) – Provisions of the Environmental Planning and Assessment Regulation 2021 (EP&A Regulation 2021)	Part 4, Division 2 of the EP&A Regulation 2021 requires the consent authority to consider "Prescribed conditions" of development consent. These matters

Section 4.15 Matters for Consideration	Comments
	have been addressed via a condition of consent.
	<u>Clause 29</u> of the EP&A Regulation 2021 requires the submission of a design verification certificate from the building designer at lodgement of the development application. This clause is not relevant to this application.
	<u>Clauses 36 and 94</u> of the EP&A Regulation 2021 allow Council to request additional information. No additional information was requested in this case.
	<u>Clause 61</u> of the EP&A Regulation 2021 requires the consent authority to consider AS 2601 - 1991: The Demolition of Structures. This matter has been addressed via a condition of consent.
	<u>Clauses 62 and/or 64</u> of the EP&A Regulation 2021 requires the consent authority to consider the upgrading of a building (including fire safety upgrade of development). This clause is not relevant to this application.
	<u>Clause 69</u> of the EP&A Regulation 2021 requires the consent authority to consider insurance requirements under the Home Building Act 1989. This matter has been addressed via a condition of consent.
	<u>Clause 69</u> of the EP&A Regulation 2021 requires the consent authority to consider the provisions of the Building Code of Australia (BCA). This matter has been addressed via a condition of consent.
Section 4.15 (1) (b) – the likely impacts of the development, including environmental impacts on the natural and built environment and social and economic impacts in the locality	(i) <b>Environmental Impact</b> The environmental impacts of the proposed development on the natural and built environment are addressed under the Pittwater 21 Development Control Plan section in this report.
	(ii) <b>Social Impact</b> The proposed development will not have a detrimental social impact in the locality considering the character of the proposal.
	(iii) <b>Economic Impact</b> The proposed development will not have a detrimental economic impact on the locality considering the nature of the existing and proposed land use.
Section 4.15 (1) (c) – the suitability of the site for the development	The site is considered suitable for the proposed development.
Section 4.15 (1) (d) – any submissions made	See discussion on "Notification & Submissions

Section 4.15 Matters for Consideration	Comments
in accordance with the EPA Act or EPA Regs	Received" in this report.
Section 4.15 (1) (e) – the public interest	No matters have arisen in this assessment that would justify the refusal of the application in the public interest.

# **EXISTING USE RIGHTS**

Existing Use Rights are not applicable to this application.

# **BUSHFIRE PRONE LAND**

The site is not classified as bush fire prone land.

# **NOTIFICATION & SUBMISSIONS RECEIVED**

The subject development application has been publicly exhibited from 05/12/2022 to 19/12/2022 in accordance with the Environmental Planning and Assessment Act 1979, Environmental Planning and Assessment Regulation 2021 and the Community Participation Plan.

As a result of the public exhibition of the application Council received no submissions.

# REFERRALS

Internal Referral Body	Comments
Landscape Officer	<ul> <li>Council's Landscape Referral is assessed against the Pittwater Local Environment Plan (PLEP) clause C4 zone Environmental Living, and the following Pittwater 21 Development Control Plan (DCP) controls (but not limited to):</li> <li>B4.22 Preservation of Trees and Bushland Vegetation</li> <li>C1.1 Landscaping</li> <li>D12 Palm Beach Locality</li> </ul>
	The site is located in the C4 Environmental Living zone, requiring development to achieve a scale integrated with the landform and landscape, and to minimise impact on the natural environment, including the retention of natural landscape features and existing trees, to satisfy the landscape objectives of the C4 Environmental Living zone. The survey plan indicates existing trees that are not present. The property does not contain any prescribed trees and as the property is located within the C4 zone, the requirements for locally native tree planting under DCP control C1.1 shall be satisfied. The submitted Landscape Plans include the proposal for two new trees including a Cupaniopsis anacardioides (Tuckeroo) which is an environmental concern due to self-seeding into bushland areas and shall be replaced with a locally native tree. The proposed Corymbia ficifolia (Flowering Gum) shall also be replaced with a locally native tree species.
	located within the C4 zone, the requirements for locally native tree planting under DCP control C1.1 shall be satisfied. The submitted Landscape Plans include the proposal for two new trees including a Cupaniopsis anacardioides (Tuckeroo) which is an environmental concern due to self-seeding into bushland areas and shall be replace with a locally native tree. The proposed Corymbia ficifolia (Flowering Gum) shall also be replaced with a locally native tree species.

Internal Referral Body	Comments
	terms of landscape outcome, conditions shall be imposed to ensure appropriate tree planting under C1.1 and it is noted that the landscape plans do provide extensive boundary screening and low height planting within garden beds to improve the landscape setting. All existing road reserve street trees shall be retained.
	It is noted that the public road reserve is encroached by landscape works and the status of the encroachment is unknown, and any approval of this application is limited to works within the property boundary.
	Should the application be approved by the Assessing Planning Officer, Landscape Referral provide conditions of consent.
NECC (Bushland and Biodiversity)	The proposal seeks approval for the construction of a swimming pool, cabana, decks and associated landscaping. The proposal has been assessed against the following provisions:
	<ul> <li>SEPP (Resilience and Hazards) 2021 - Chapter 2 Development within the coastal environment</li> <li>Pittwater DCP 21 - Clause B4.3 Flora and Fauna Habitat Enhancement Category 2 Land</li> </ul>
	The swimming pool will be constructed in an area of the site that has previously been disturbed. No native vegetation or fauna habitat would be impacted, the development is designed, sited and will be managed to avoid any significant adverse environmental impact.
NECC (Coast and Catchments)	The application is supported subject to conditions.
	This application was assessed in consideration of: • Supplied plans and reports;
	<ul> <li>Coastal Management Act 2016;</li> <li>State Environmental Planning Policy (Resilience and Hazards) 2021 (section 2.10 &amp; 2.12);</li> <li>Relevant LEP and DCP clauses.</li> </ul>
Strategic and Place Planning	HERITAGE COMMENTS
(Heritage Officer)	Discussion of reason for referral
	The proposal has been referred to Heritage as the subject site adjoins a heritage conservation area
	<b>C4 - Ocean Road Heritage Conservation Area</b> - 27 to 38 Ocean Road
	Details of heritage items affected
	Details of the item are as follows:
	<u>Statement of Significance</u> The Ocean Road Heritage Conservation Area is historically significant as it comprises a group of early residences of Palm Beach and two natural reserves. Some houses and grounds comprise more than one lot. It was originally owned by first group of

# ENVIRONMENTAL PLANNING INSTRUMENTS (EPIs)\*

All, Environmental Planning Instruments (SEPPs and LEPs), Development Controls Plans and Council Policies have been considered in the merit assessment of this application.

In this regard, whilst all provisions of each Environmental Planning Instruments (SEPPs and LEPs), Development Controls Plans and Council Policies have been considered in the assessment, many provisions contained within the document are not relevant or are enacting, definitions and operational provisions which the proposal is considered to be acceptable against.

As such, an assessment is provided against the controls relevant to the merit consideration of the application hereunder.

# State Environmental Planning Policies (SEPPs) and State Regional Environmental Plans (SREPs)

# SEPP (Transport and Infrastructure) 2021

# Ausgrid

Section 2.48 of Chapter 2 requires the Consent Authority to consider any development application (or an application for modification of consent) for any development carried out:

- within or immediately adjacent to an easement for electricity purposes (whether or not the electricity infrastructure exists).
- immediately adjacent to an electricity substation.
- within 5.0m of an overhead power line.
- includes installation of a swimming pool any part of which is: within 30m of a structure supporting an overhead electricity transmission line and/or within 5.0m of an overhead electricity power line.

# Comment:

The proposal was referred to Ausgrid who raised no objections, subject to conditions which have been included in the recommendation of this report.

# SEPP (Resilience and Hazards) 2021

#### Chapter 2 – Coastal Management

The site is subject to Chapter 2 of the SEPP. Accordingly, an assessment under Chapter 2 has been carried out as follows:

# Division 4 Coastal use area 2.11 Development on land within the coastal use area

1) Development consent must not be granted to development on land that is within the coastal

use area unless the consent authority:

- a) has considered whether the proposed development is likely to cause an adverse impact on the following:
  - i) existing, safe access to and along the foreshore, beach, headland or rock
  - ii) platform for members of the public, including persons with a disability,
  - iii) overshadowing, wind funnelling and the loss of views from public places to
  - iv) foreshores,
  - v) the visual amenity and scenic qualities of the coast, including coastal headlands,

Aboriginal cultural heritage, practices and places,

cultural and built environment heritage, and

- b) is satisfied that:
  - i) the development is designed, sited and will be managed to avoid an adverse
  - ii) impact referred to in paragraph (a), or
  - iii) if that impact cannot be reasonably avoided—the development is designed, sited and will be managed to minimise that impact, or if that impact cannot be minimised—the development will be managed to mitigate that impact, and
- c) has taken into account the surrounding coastal and built environment, and the bulk, scale and size of the proposed development.

# Comment:

The proposed development is considered to be consistent with the surrounding coastal and built environment and avoids any adverse impacts referred to in the abovementioned paragraph (a).

# Division 5 General

# 2.12 Development in coastal zone generally—development not to increase risk of coastal hazards

Development consent must not be granted to development on land within the coastal zone unless the consent authority is satisfied that the proposed development is not likely to cause increased risk of coastal hazards on that land or other land.

#### Comment:

The proposed development is not anticipated to result in any increased risks of coastal hazards on the subject site or surrounding land.

# 2.13 Development in coastal zone generally—coastal management programs to be considered

Development consent must not be granted to development on land within the coastal zone unless the consent authority has taken into consideration the relevant provisions of any certified coastal management program that applies to the land.

#### Comment:

The application has been referred to Council's Coast and Catchments team who considered the proposal in relation to coastal management programs and found the proposal to be supportable, subject to conditions.

As such, it is considered that the application complies with the requirements of Chapter 2 of the State Environmental Planning Policy (Resilience and Hazards) 2021.

# Chapter 4 – Remediation of Land

Sub-section 4.6 (1)(a) of Chapter 4 requires the Consent Authority to consider whether land is contaminated. Council records indicate that the subject site has been used for residential purposes for a significant period of time with no prior land uses. In this regard it is considered that the site poses no risk of contamination and therefore, no further consideration is required under sub-section 4.6 (1)(b) and (c) of this Chapter and the land is considered to be suitable for the residential land use.

# Pittwater Local Environmental Plan 2014

Is the development permissible?	Yes	
After consideration of the merits of the proposal, is the development consistent with:		
aims of the LEP? Yes		
zone objectives of the LEP?	Yes	

#### Principal Development Standards

Standard	Requirement	Proposed	% Variation	Complies
Height of Buildings:	8.5m	Cabana roof: 2.9m	-	Yes

#### **Compliance Assessment**

Clause	Compliance with Requirements
4.3 Height of buildings	Yes
7.1 Acid sulfate soils	Yes
7.2 Earthworks	Yes
7.7 Geotechnical hazards	Yes
7.10 Essential services	Yes

#### Detailed Assessment

# Zone C4 Environmental Living

The underlying objectives of the C4 Environmental Living zone are:

• To provide for low-impact residential development in areas with special ecological, scientific or aesthetic values.

#### Comment:

The proposed development maintains the residential character of the area.

• To ensure that residential development does not have an adverse effect on those values.

Comment:

DA2022/2035

The development is not anticipated to result in any adverse impacts on the ecological, scientic or aesthetic values of the Palm Beach locality.

• To provide for residential development of a low density and scale integrated with the landform and landscape.

#### Comment:

The proposed development is consistent with the low density nature of the residential area and complies with the prescribed principal development standard for building height to ensure the development achieves an appropriate scale that is integrated with the landform and landscape.

• To encourage development that retains and enhances riparian and foreshore vegetation and wildlife corridors.

Comment:

The proposal will retain sufficient vegetation that will enhance biodiversity and preserve wildlife corridors.

# 7.7 Geotechnical hazards

Under Clause 7.7 Geotechnical Hazards, before determining a development application for development on land to which this clause applies, the consent authority must consider the following matters to decide whether or not the development takes into account all geotechnical risks:

- (a) site layout, including access,
- (b) the development's design and construction methods,
- (c) the amount of cut and fill that will be required for the development,
- (d) waste water management, stormwater and drainage across the land,
- (e) the geotechnical constraints of the site,

(f) any appropriate measures proposed to avoid, minimise or mitigate the impacts of the development.

Development consent must not be granted to development on land to which this clause applies unless: (a) the consent authority is satisfied that the development will appropriately manage waste water, stormwater and drainage across the land so as not to affect the rate, volume and quality of water leaving the land, and

(b) the consent authority is satisfied that:

(*i*) the development is designed, sited, and will be managed to avoid any geotechnical risk and significant adverse impact on the development and the land surrounding the development, or (*ii*) if that risk or impact cannot be reasonably avoided - the development is designed, sited and will be managed to minimise that risk or impact, or

(iii) if that risk or impact cannot be minimised - the development will be managed to mitigate that risk or impact.

#### Comment:

The proposed development is supported by a geotechnical risk assessment that demonstrates all geotechnical risks have been taken into account. As such, Council can be satisfied that the proposed development has been designed, sited, and will be managed to avoid any geotechnical risk and significant adverse impact on the development and the land surrounding the development.

# Pittwater 21 Development Control Plan

Built Form Controls				
Built Form Control	Requirement	Proposed	% Variation*	Complies
Front building line	6.5m	N/A - proposal is in the rear yard	-	Yes

C1.1 Landscaping	Yes	Yes
C1.2 Safety and Security	Yes	Yes
C1.3 View Sharing	Yes	Yes
C1.4 Solar Access	Yes	Yes
C1.5 Visual Privacy	Yes	Yes
C1.6 Acoustic Privacy	Yes	Yes
C1.7 Private Open Space	Yes	Yes
C1.12 Waste and Recycling Facilities	Yes	Yes
C1.13 Pollution Control	Yes	Yes
C1.17 Swimming Pool Safety	Yes	Yes
C1.23 Eaves	Yes	Yes
C1.25 Plant, Equipment Boxes and Lift Over-Run	Yes	Yes

Clause		Consistency Aims/Objectives
D12.1 Character as viewed from a public place	Yes	Yes
D12.3 Building colours and materials	Yes	Yes
D12.5 Front building line	Yes	Yes
D12.6 Side and rear building line	No	Yes
D12.10 Landscaped Area - Environmentally Sensitive Land	No	Yes
D12.14 Scenic Protection Category One Areas	Yes	Yes

# **Detailed Assessment**

# D12.6 Side and rear building line

Clause D12.6 of the DCP requires a minimum setback of 6.5m to the rear boundary. The proposed deck to the east of the proposed pool is setback 2.3m from the rear boundary, resulting in a variation of 64.62% (4.2m) to the control.

Additionally, the control stipulates that development is required to be setback at least 2.5m from one side boundary and 1m from the other. The proposal is fully compliant with the side setback requirements along both the south-eastern and north-western side boundaries.

#### Merit Consideration

With regards to the consideration for a variation for the numerically non-complaint rear setback, the development is considered against the underlying objectives of the control as follows:

# • To achieve the desired future character of the Locality.

#### Comment:

The proposed development is consistent with the desired future character of the Palm Beach Locality as it maintains a low-density residential character in a landscaped setting.

# • To bulk and scale of the built form is minimised.

# Comment:

The single storey appearance and open nature of the proposed cabana maintains a built form of an appropriate size and scale on the subject site. Moreover, the inground swimming pool will maintain a sense of openness in the rear yard and is anticipated to have a negligible visual impact when viewed from surrounding properties.

#### • Equitable preservation of views and vistas to and/or from public/private places.

# Comment:

The proposal is not anticipated to result in any significant view loss to and from public and private places. It should also be noted that the proposed development's location in the rear yard will not have any impact on the existing presentation of streetscape.

# • To encourage view sharing through complimentary siting of buildings, responsive design and well-positioned landscaping.

# Comment:

Existing views obtained from neighbouring properties and the streetscape will be maintained due to the relatively small scale nature of the development.

# • To ensure a reasonable level of privacy, amenity and solar access is provided within the development site and maintained to residential properties.

#### Comment:

Notwithstanding the numerical non-compliance to the rear boundary setback, the proposed development ensures a reasonable level of privacy and amenity will be maintained through the incorporation of screen planting into the design. The proposal is not anticipated to result in any overshadowing to adjoining properties due to the low lying nature of the proposed structures.

# • Substantial landscaping, a mature tree canopy and an attractive streetscape.

# Comment:

The proposed development retains adequate landscaped areas for the retention of existing vegetation and provides opportunities for future planting to contribute to an attractive streetscape.

# • Flexibility in the siting of buildings and access.

#### Comment:

Flexibility in the siting of buildings is considered appropriate in this instance given the irregular shape of the lot. Notably, the existing dwelling house encroaches into the rear setback, as well as the south-eastern side boundary. As such, the new cabana and pool respond to the existing setbacks on the site which are numerically non-compliant, and are in keeping with the surrounding development on irregular shaped lots due to the curvature of Florida Road.

# • Vegetation is retained and enhanced to visually reduce the built form.

#### Comment:

The application has been referred to Council's Landscape Officer who is supportive of the proposal. Subject to conditions, the proposed development will ensure vegetation is retained and enhanced to visually reduce the built form.

# • To ensure a landscape buffer between commercial and residential zones is established.

#### Comment:

The proposed development does not adjoin a commercial zone, therefore this objective is not relevant for this application.

Having regard to the above assessment, it is concluded that the proposed development is consistent with the relevant objectives of PDCP 2014 and the objectives specified in s1.3 of the Environmental Planning and Assessment Act, 1979. Accordingly, this assessment finds that the proposal is supported, in this particular circumstance.

# D12.10 Landscaped Area - Environmentally Sensitive Land

# Description of non-compliance

The control requires a minimum of 60% ( $601.32m^2$ ) of the site to be landscaped area. The proposal presents a numerically non-compliant landscaped area of 57.5% ( $576.3m^2$ ), resulting in a 2.5% ( $25.02m^2$ ) variation to the control.

However, the Pittwater DCP stipulates that provided the outcomes of the control are achieved, a variation may be permitted which allows for up to 6% of the total site area to be provided as impervious landscape treatments providing these areas are for outdoor recreational purposes only. With the introduction of impervious areas, the proposed landscaped area increases by 60.13m<sup>2</sup>, resulting in a landscaped area of 63.5% (636.43m2) on the subject site, which is fully compliant with the control. The proposed development is considered against the underlying objectives of the control below:

# Merit Consideration

# • Achieve the desired future character of the Locality.

#### <u>Comment</u>

The proposed development is consistent with the scale and built form of the predominantly low density residential area and therefore achieves the desired future character of the Locality.

• The bulk and scale of the built form is minimised.

#### **Comment**

The proposed cabana and inground pool can be considered to be of a relatively minor scale and will therefore not contribute to any unreasonable bulk on the subject site. The proposed development has been well integrated with the landform and existing and proposed landscaping, demonstrating consistency with the scale of other developments observed in the vicinity of the site.

# • A reasonable level of amenity and solar access is provided and maintained.

#### Comment

Given the relatively modest nature of the proposed structures in the rear yard, a suitable level of amenity and solar access is anticipated to be maintained to adjoining and surrounding properties.

• Vegetation is retained and enhanced to visually reduce the built form.

# **Comment**

The application is accompanied by a landscape plan which provides for the enhancement of screen planting to the perimeter of the proposed new structures to visually reduce the built form.

# • Conservation of natural vegetation and biodiversity.

#### **Comment**

The proposed development will not involve the removal of any significant vegetation and adequate areas of soft landscaping will be retained throughout the site to ensure existing biodiversity will be conserved.

• Stormwater runoff is reduced, preventing soil erosion and siltation of natural drainage

# channels.

# <u>Comment</u>

The new cabana roof is proposed to be connected to existing on site stormwater arrangements to ensure that stormwater is appropriately managed.

# • To preserve and enhance the rural and bushland character of the area.

#### <u>Comment</u>

The subject site will retain sufficient areas to support existing and future planting to preserve and enhance the natural environment and bushland character of the area.

# • Soft surface is maximised to provide for infiltration.

#### **Comment**

Sufficient pervious surfacing is provided on-site which will enable the infiltration of water to the water table, whilst minimising run-off and assisting with stormwater management.

Having regard to the above assessment, it is concluded that the outcomes of the clause have been achieved. Therefore, the application is supported on merit in this particular circumstance.

# THREATENED SPECIES, POPULATIONS OR ECOLOGICAL COMMUNITIES

The proposal will not significantly affect threatened species, populations or ecological communities, or their habitats.

# **CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN**

The proposal is consistent with the principles of Crime Prevention Through Environmental Design.

# POLICY CONTROLS

# Northern Beaches Section 7.12 Contributions Plan 2022

The proposal is subject to the application of Northern Beaches Section 7.12 Contributions Plan 2022.

A monetary contribution of \$4,070 is required for the provision of new and augmented public infrastructure. The contribution is calculated as 1% of the total development cost of \$407,000.

#### CONCLUSION

The site has been inspected and the application assessed having regard to all documentation submitted by the applicant and the provisions of:

- Environmental Planning and Assessment Act 1979;
- Environmental Planning and Assessment Regulation 2021;
- All relevant and draft Environmental Planning Instruments;
- Pittwater Local Environment Plan;
- Pittwater Development Control Plan; and
- Codes and Policies of Council.

This assessment has taken into consideration the submitted plans, Statement of Environmental Effects, all other documentation supporting the application and public submissions, and does not result in any unreasonable impacts on surrounding, adjoining, adjacent and nearby properties subject to the conditions contained within the recommendation.

In consideration of the proposal and the merit consideration of the development, the proposal is considered to be:

- Consistent with the objectives of the DCP
- Consistent with the zone objectives of the LEP
- Consistent with the aims of the LEP
- Consistent with the objectives of the relevant EPIs
- Consistent with the objects of the Environmental Planning and Assessment Act 1979

It is considered that the proposed development satisfies the appropriate controls and that all processes and assessments have been satisfactorily addressed.

# RECOMMENDATION

THAT Council as the consent authority grant Development Consent to DA2022/2035 for Construction of a swimming pool, cabana, decks and associated landscaping on land at Lot 96 DP 6937, 50 Florida Road, PALM BEACH, subject to the conditions printed below:

# **DEVELOPMENT CONSENT OPERATIONAL CONDITIONS**

#### 1. Approved Plans and Supporting Documentation

The development must be carried out in compliance with the endorsed stamped plans and documentation listed below, except as amended by any other condition of consent:

a) Approved Plans

Architectural Plans - Endorsed with Council's stamp			
Drawing No. Dated Prepared By			
Site Plan - Issue A	21 November 2022	True Form Landscape Architecture	
Section Plans - Issue A	21 November 2022	True Form Landscape Architecture	
Demolition Plan - Issue A	21 November 2022	True Form Landscape Architecture	
Cut and Fill Plan - Issue A	21 November 2022	True Form Landscape Architecture	

Reports / Documentation – All recommendations and requirements contained			
within:			

Report No. / Page No. / Section No.	Dated	Prepared By

Geotechnical Report	13 October 2022	Ascent Geo
---------------------	-----------------	------------

b) Any plans and / or documentation submitted to satisfy the Conditions of this consent.

c) The development is to be undertaken generally in accordance with the following:

Landscape Plans			
Drawing No.	Dated	Prepared By	
Landscape Plan - Issue A		True Form Landscape Architecture	

Waste Management Plan			
Drawing No/Title.	Dated	Prepared By	
Waste Management Plan		True Form Landscape Architecture	

In the event of any inconsistency between conditions of this consent and the drawings/documents referred to above, the conditions of this consent will prevail.

Reason: To ensure the work is carried out in accordance with the determination of Council and approved plans.

#### 2. **Compliance with Other Department, Authority or Service Requirements** The development must be carried out in compliance with all recommendations and

requirements, excluding general advice, within the following:

Other Department, Authority or Service	EDMS Reference	Dated
Ausgrid	Ausgrid Referral Response	8 December 2022

(NOTE: For a copy of the above referenced document/s, please see Application Tracking on Council's website <u>www.northernbeaches.nsw.gov.au</u>)

Reason: To ensure the work is carried out in accordance with the determination and the statutory requirements of other departments, authorities or bodies.

# 3. **Prescribed Conditions**

- (a) All building works must be carried out in accordance with the requirements of the Building Code of Australia (BCA).
- (b) BASIX affected development must comply with the schedule of BASIX commitments specified within the submitted BASIX Certificate (demonstrated compliance upon plans/specifications is required prior to the issue of the Construction Certificate);
- (c) A sign must be erected in a prominent position on any site on which building work, subdivision work or demolition work is being carried out:
  - (i) showing the name, address and telephone number of the Principal Certifier for the work, and
  - (ii) showing the name of the principal contractor (if any) for any building work and a telephone number on which that person may be contacted outside working hours, and

(iii) stating that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the building work, subdivision work or demolition work is being carried out, but must be removed when the work has been completed.

- (d) Residential building work within the meaning of the Home Building Act 1989 must not be carried out unless the Principal Certifier for the development to which the work relates (not being the Council) has given the Council written notice of the following information:
  - (i) in the case of work for which a principal contractor is required to be appointed:
    - A. the name and licence number of the principal contractor, and
    - B. the name of the insurer by which the work is insured under Part 6 of that Act,
  - (ii) in the case of work to be done by an owner-builder:
    - A. the name of the owner-builder, and
    - B. if the owner-builder is required to hold an owner-builder permit under that Act, the number of the owner-builder permit.

If arrangements for doing the residential building work are changed while the work is in progress so that the information notified under becomes out of date, further work must not be carried out unless the Principal Certifier for the development to which the work relates (not being the Council) has given the Council written notice of the updated information.

- (e) Development that involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development consent must, at the person's own expense:
  - (i) protect and support the adjoining premises from possible damage from the excavation, and
  - (ii) where necessary, underpin the adjoining premises to prevent any such damage.
  - (iii) must, at least 7 days before excavating below the level of the base of the footings of a building on an adjoining allotment of land, give notice of intention to do so to the owner of the adjoining allotment of land and furnish particulars of the excavation to the owner of the building being erected or demolished.
  - (iv) the owner of the adjoining allotment of land is not liable for any part of the cost of work carried out for the purposes of this clause, whether carried out on the allotment of land being excavated or on the adjoining allotment of land.

In this clause, allotment of land includes a public road and any other public place.

Reason: Legislative requirement.

# 4. General Requirements

- (a) Unless authorised by Council: Building construction and delivery of material hours are restricted to:
  - 7.00 am to 5.00 pm inclusive Monday to Friday,
  - 8.00 am to 1.00 pm inclusive on Saturday,
  - No work on Sundays and Public Holidays.

Demolition and excavation works are restricted to:

• 8.00 am to 5.00 pm Monday to Friday only.

(Excavation work includes the use of any excavation machinery and the use of jackhammers, rock breakers, excavators, loaders and the like, regardless of whether the activities disturb or alter the natural state of the existing ground stratum or are breaking up/removing materials from the site).

- (b) Should any asbestos be uncovered on site, its demolition and removal must be carried out in accordance with WorkCover requirements and the relevant Australian Standards.
- (c) At all times after the submission the Notice of Commencement to Council, a copy of the Development Consent and Construction Certificate is to remain onsite at all times until the issue of an Occupation Certificate. The consent shall be available for perusal of any Authorised Officer.
- (d) Where demolition works have been completed and new construction works have not commenced within 4 weeks of the completion of the demolition works that area affected by the demolition works shall be fully stabilised and the site must be maintained in a safe and clean state until such time as new construction works commence.
- (e) Onsite toilet facilities (being either connected to the sewer or an accredited sewer management facility) for workers are to be provided for construction sites at a rate of 1 per 20 persons.
- (f) Prior to the release of the Construction Certificate, payment of the Long Service Levy is required. This payment can be made at Council or to the Long Services Payments Corporation. Payment is not required where the value of the works is less than \$25,000. The Long Service Levy is calculated on 0.35% of the building and construction work. The levy rate and level in which it applies is subject to legislative change. The applicable fee at the time of payment of the Long Service Levy will apply.
- (g) The applicant shall bear the cost of all works associated with the development that occurs on Council's property.
- (h) No skip bins, building materials, demolition or excavation waste of any nature, and no hoist, plant or machinery (crane, concrete pump or lift) shall be placed on Council's footpaths, roadways, parks or grass verges without Council Approval.
- (i) Demolition materials and builders' wastes are to be removed to approved waste/recycling centres.
- (j) No trees or native shrubs or understorey vegetation on public property (footpaths, roads, reserves, etc.) or on the land to be developed shall be removed or damaged during construction unless specifically approved in this consent including for the erection of any fences, hoardings or other temporary works.
- (k) Prior to the commencement of any development onsite for:
  - i) Building/s that are to be erected
  - ii) Building/s that are situated in the immediate vicinity of a public place and is dangerous to persons or property on or in the public place
  - iii) Building/s that are to be demolished
  - iv) For any work/s that is to be carried out
  - v) For any work/s that is to be demolished

The person responsible for the development site is to erect or install on or around the development area such temporary structures or appliances (wholly within the

development site) as are necessary to protect persons or property and to prevent unauthorised access to the site in order for the land or premises to be maintained in a safe or healthy condition. Upon completion of the development, such temporary structures or appliances are to be removed within 7 days.

- (I) A "Road Opening Permit" must be obtained from Council, and all appropriate charges paid, prior to commencement of any work on Council property. The owner/applicant shall be responsible for all public utilities and services in the area of the work, shall notify all relevant Authorities, and bear all costs associated with any repairs and/or adjustments as those Authorities may deem necessary.
- (m) The works must comply with the relevant Ausgrid Network Standards and SafeWork NSW Codes of Practice.
- (n) Requirements for new swimming pools/spas or existing swimming pools/spas affected by building works.
  - (1) Child resistant fencing is to be provided to any swimming pool or lockable cover to any spa containing water and is to be consistent with the following;

Relevant legislative requirements and relevant Australian Standards (including but not limited) to:

- (i) Swimming Pools Act 1992
- (ii) Swimming Pools Amendment Act 2009
- (iii) Swimming Pools Regulation 2018
- (iv) Australian Standard AS1926 Swimming Pool Safety
- (v) Australian Standard AS1926.1 Part 1: Safety barriers for swimming pools
- (vi) Australian Standard AS1926.2 Part 2: Location of safety barriers for swimming pools.
- (2) A 'KEEP WATCH' pool safety and aquatic based emergency sign, issued by Royal Life Saving is to be displayed in a prominent position within the pool/spa area.
- (3) Filter backwash waters shall be conveyed to the Sydney Water sewerage system in sewered areas or managed on-site in unsewered areas in a manner that does not cause pollution, erosion or run off, is separate from the irrigation area for any wastewater system and is separate from any onsite stormwater management system.
- (4) Swimming pools and spas must be registered with the Division of Local Government.

Reason: To ensure that works do not interfere with reasonable amenity expectations of residents and the community.

# FEES / CHARGES / CONTRIBUTIONS

# 5. Policy Controls

Northern Beaches Section 7.12 Contributions Plan 2022

A monetary contribution of \$4,070.00 is payable to Northern Beaches Council for the provision of local infrastructure and services pursuant to section 7.12 of the Environmental Planning & Assessment Act 1979 and the Northern Beaches Section 7.12 Contributions Plan (as amended).

The monetary contribution is based on a development cost of \$407,000.00.

The total amount payable will be adjusted at the time the payment is made, in accordance with the provisions of the Northern Beaches Section 7.12 Contributions Plan (as amended).

Details demonstrating compliance, by way of written receipts issued by Council, are to be submitted to the Certifier prior to issue of any Construction Certificate or, if relevant, the Subdivision Certificate (whichever occurs first).

A copy of the Contributions Plan is available for inspection at 725 Pittwater Road, Dee Why or on Council's website at Northern Beaches Council - Development Contributions.

Reason: To provide for contributions in accordance with the Contribution Plan to fund the provision of new or augmented local infrastructure and services.

# 6. Security Bond

A bond (determined from cost of works) of \$2,000 and an inspection fee in accordance with Council's Fees and Charges paid as security are required to ensure the rectification of any damage that may occur to the Council infrastructure contained within the road reserve adjoining the site as a result of construction or the transportation of materials and equipment to and from the development site.

An inspection fee in accordance with Council adopted fees and charges (at the time of payment) is payable for each kerb inspection as determined by Council (minimum (1) one inspection).

All bonds and fees shall be deposited with Council prior to Construction Certificate or demolition work commencing, and details demonstrating payment are to be submitted to the Certifier prior to the issue of the Construction Certificate.

To process the inspection fee and bond payment a Bond Lodgement Form must be completed with the payments (a copy of the form is attached to this consent and alternatively a copy is located on Council's website at www.northernbeaches.nsw.gov.au).

Reason: To ensure adequate protection of Council's infrastructure.

# CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE

#### 7. Amendment of Landscape Plans

The submitted Landscape Plan is to be amended in accordance with the following:

 Development shall ensure that at least 60% of any new planting incorporates native vegetation (as per species listed in Native Plants for Your Garden available on the Pittwater Council website). Landscaping is to be outside areas of core bushland and not include environmental weeds.

The amended Landscape Plan is to be certified by a qualified landscape architect and provided to the Certifier prior to issue of the Construction Certificate.

Reason: To ensure compliance with the requirement to retain and protect significant planting on the site.

#### 8. Stormwater Drainage Disposal

The stormwater drainage systems for the development are to be designed, installed and maintained in accordance with Council's Water Management for Development Policy.

All stormwater drainage systems must comply with the requirements of Council's Water Management for Development Policy. Any recommendations identified within a Geotechnical Report relevant to the development are to be incorporated into the design of the stormwater drainage system. Details demonstrating compliance from a qualified and practising Civil Engineer and where relevant a Geotechnical Engineer must be submitted to and approved by the Certifier prior to the issue of a Construction Certificate.

When the proposed discharge point for the development in this consent cannot strictly comply with the Water Management for Development Policy, the Applicant must apply to verify the proposed discharge point by gaining Council approval via a Stormwater Drainage Application. Council approval must be provided to the Certifier prior to the issue of a Construction Certificate when a Stormwater Drainage Application is required. The Stormwater Drainage Application form can be found on Council's website.

Compliance with this condition must not result in variations to the approved development or additional tree removal.

Reason: To ensure satisfactory management of stormwater.

9. Geotechnical Report Recommendations have been Incorporated into Designs and Structural Plans

The recommendations of the risk assessment required to manage the hazards as identified in the Geotechnical Report referenced in Condition 1 of this consent are to be incorporated into the construction plans.

Prior to issue of the Construction Certificate, Form 2 of the Geotechnical Risk Management Policy for Pittwater (Appendix 5 of P21 DCP) is to be completed and submitted to the Certifier.

Details demonstrating compliance are to be submitted to the Certifier prior to the issue of a Construction Certificate.

Reason: To ensure geotechnical risk is mitigated appropriately.

# 10. Compliance with Standards

The development is required to be carried out in accordance with all relevant Australian Standards.

Details demonstrating compliance with the relevant Australian Standard are to be submitted to the Certifier prior to the issue of the Construction Certificate.

Reason: To ensure the development is constructed in accordance with appropriate standards.

#### 11. External Finishes to Roof

The external finish to the roof shall have a medium to dark range (BCA classification M and D) in order to minimise solar reflections to neighbouring properties. Any roof with a metallic steel finish is not permitted.

Details demonstrating compliance are to be submitted to the Certifier prior to the issue of the Construction Certificate.

Reason: To ensure that excessive glare or reflectivity nuisance does not occur as a result of the development.

# 12. Sydney Water "Tap In"

The approved plans must be submitted to the Sydney Water Tap in service, prior to works commencing, to determine whether the development will affect any Sydney Water assets and/or easements. The appropriately stamped plans must then be submitted to the Certifier demonstrating the works are in compliance with Sydney Water requirements.

Please refer to the website www.sydneywater.com.au for:

- "Tap in" details see http://www.sydneywater.com.au/tapin
- o Guidelines for Building Over/Adjacent to Sydney Water Assets.

Or telephone 13 000 TAP IN (1300 082 746).

Reason: To ensure compliance with the statutory requirements of Sydney Water.

# CONDITIONS THAT MUST BE ADDRESSED PRIOR TO ANY COMMENCEMENT

# 13. Installation and Maintenance of Sediment and Erosion Control

Sediment and erosion controls must be installed in accordance with Landcom's 'Managing Urban Stormwater: Soils and Construction' (2004). Techniques used for erosion and sediment control on site are to be adequately maintained and monitored at all times, particularly after periods of rain, and shall remain in proper operation until all development activities have been completed and the site is sufficiently stabilised with vegetation.

Reason: To protect the surrounding environment from the effects of sedimentation and erosion from the site

# CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK

# 14. Tree and Vegetation Protection

a) Existing trees and vegetation shall be retained and protected, including:

i) all trees and vegetation within the site, excluding exempt trees and vegetation under the relevant planning instruments of legislation,

ii) all trees and vegetation located on adjoining properties,

iii) all road reserve trees.

b) Tree protection shall be undertaken as follows:

i) tree protection shall be in accordance with Australian Standard 4970-2009 Protection of Trees on Development Sites, including the provision of temporary fencing to protect existing trees within 5 metres of development,

ii) existing ground levels shall be maintained within the tree protection zone of trees to be retained, unless authorised by an Arborist with minimum AQF Level 5 in arboriculture, iii) removal of existing tree roots at or >25mm ( $\emptyset$ ) diameter is not permitted without consultation with an Arborist with minimum AQF Level 5 in arboriculture,

iv) no excavated material, building material storage, site facilities, nor landscape materials are to be placed within the canopy dripline of trees and other vegetation required to be retained,

v) structures are to bridge tree roots at or >25mm ( $\emptyset$ ) diameter unless directed by an Arborist with minimum AQF Level 5 in arboriculture on site,

vi) excavation for stormwater lines and all other utility services is not permitted within the tree protection zone, without consultation with an Arborist with minimum AQF Level 5 in arboriculture

including advice on root protection measures,

vii) should either or all of v) or vi) occur during site establishment and construction works, an Arborist with minimum AQF Level 5 in arboriculture shall provide recommendations for tree protection measures. Details including photographic evidence of works undertaken shall be submitted by the Arborist to the Principal Certifier,

viii) any temporary access to, or location of scaffolding within the tree protection zone of a protected tree or any other tree to be retained during the construction works is to be undertaken using the protection measures specified in sections 4.5.3 and 4.5.6 of Australian Standard 4970-2009 Protection of Trees on Development Sites,

ix) tree pruning from within the site to enable approved works shall not exceed 10% of any tree canopy, and shall be in accordance with Australian Standard 4373-2007 Pruning of Amenity Trees, and should additional pruning be required an application to Council's Tree Services shall be submitted for approval or otherwise.

#### The Principal Certifier must ensure that:

c) The activities listed in section 4.2 of Australian Standard 4970-2009 Protection of Trees on Development Sites, do not occur within the tree protection zone of any tree, and any temporary access to, or location of scaffolding within the tree protection zone of a protected tree, or any other tree to be retained on the site during the construction, is undertaken using the protection measures specified in sections 4.5.3 and 4.5.6 of that standard.

Note: All street trees within the road verge and trees within private property are protected under Northern Beaches Council development control plans, except where Council's written consent for removal has been obtained. The felling, lopping, topping, ringbarking, or removal of any tree (s) is prohibited. No excavated material, building material storage, site facilities, nor landscape materials are to be placed within the canopy dripline of street trees.

Reason: Tree and vegetation protection.

#### 15. Wildlife Protection

If construction activity associated with this development results in injury or displacement of a native mammal, bird, reptile or amphibian, a registered wildlife rescue and rehabilitation organisation must be contacted for advice.

Reason: To protect native wildlife.

#### 16. Geotechnical Requirements

All recommendations (if any) included in the Geotechnical Report referenced in Condition 1 of this consent are required to be complied with during works.

Reason: To ensure geotechnical risk is mitigated appropriately.

#### 17. Survey Certificate

A survey certificate prepared by a Registered Surveyor is to be provided demonstrating all perimeter walls columns and or other structural elements, floor levels and the finished roof/ridge height are in accordance with the approved plans.

Details demonstrating compliance are to be submitted to the Principal Certifier when the external structure of the building is complete.

Reason: To demonstrate the proposal complies with the approved plans.

# 18. Waste Management During Development

The reuse, recycling or disposal of waste during works must be done generally in accordance with the Waste Management Plan for this development.

Details demonstrating compliance must be submitted to the Principal Certifier.

Reason: To ensure demolition and construction waste is recycled or reused and to limit landfill.

# CONDITIONS WHICH MUST BE COMPLIED WITH PRIOR TO THE ISSUE OF THE OCCUPATION CERTIFICATE

# 19. Landscape Completion

Landscape works shall be implemented in accordance with the approved Landscape Plans, and inclusive of the following conditions:

 i) the nominated Cupaniopsis anacardioides and Corymbia ficifolia tree planting shall be deleted and substituted with locally native species as selected from Northern Beaches Council's Native Plant Species Guide - Narrabeen Ward, or Council's Tree Guide, capable of attaining at least 6.0 metres in height,

ii) a total of three (3) locally native tree species are required to be planted within the property, iii) all tree planting shall be a minimum pre-ordered planting size of 75 litres, and shall meet the requirements of Natspec - Specifying Trees, planted into a prepared planting hole 1m x 1m x 600mm depth, backfilled with a sandy loam mix or approved similar, mulched to 75mm depth minimum and maintained, and watered until established, and shall be located at least 3.0 metres from buildings (preferably 5 metres), at least 5 metres from other trees, at least 1.5 metres from common boundaries, and located either within garden bed or within a prepared bed within lawn,

iv) all proposed tree planting shall be positioned in locations to minimise significant impacts on neighbours in terms of blocking winter sunlight to living rooms, private open space and where the proposed location of trees may otherwise be positioned to minimise any significant loss of views from neighbouring and nearby dwellings and from public spaces.

Prior to the issue of an Occupation Certificate, details (from a landscape architect or landscape designer) shall be submitted to the Principal Certifier, certifying that the landscape works have been completed in accordance with any conditions of consent.

Reason: Environmental amenity.

# 20. No Weeds Imported On To The Site

No Priority or environmental weeds (as specified in the Northern Beaches Local Weed Management Plan 2021 – 2026) are to be imported on to the site prior to or during construction works.

Details demonstrating compliance are to be submitted to the Principal Certifier prior to issue of any Occupation Certificate.

Reason: To reduce the risk of site works contributing to spread of Priority and environmental weeds.

#### 21. Stormwater Drainage Disposal Certification

Certification from an appropriately qualified and practising Civil Engineer demonstrating the stormwater drainage systems have been designed and installed in accordance with the requirements of Council's Water Management for Development Policy and where relevant a Geotechnical Engineer shall be provided to the Principal Certifier prior to the issue of an Occupation Certificate, and;

If any on site stormwater detention system is installed the Applicant shall lodge the Legal Documents Authorisation Application with Council.

The application is to include the completed request forms (NSW Land Registry standard forms 13PC and/or 13RPA) and a copy of the Works-as-Executed plan (details overdrawn on a copy of the approved drainage plan), hydraulic engineers' certification. A guide to the process and associated Legal Document Authorisation Application form can be found on Council's website The Applicant shall create on the Title a positive covenant in respect to the ongoing maintenance and restriction as to user over the on-site stormwater detention system within this development consent.

The terms of the positive covenant and restriction are to be prepared to Council's standard requirements at the applicant's expense and endorsed by Northern Beaches Council's delegate prior to lodgement with the NSW Land Registry Services. Northern Beaches Council shall be nominated as the authority to release, vary or modify such covenant. A copy of the certificate of title demonstrating the creation of the positive covenant and restriction as to user for the on-site stormwater detention system is to be submitted.

Details demonstrating compliance are to be submitted to the Principal Certifier prior to the issue of an Occupation Certificate.

Reason: To ensure satisfactory management of stormwater.

# 22. Geotechnical Certification Prior to Occupation Certificate

The Applicant is to submit the completed Form 3 of the Geotechnical Risk Management Policy (Appendix 5 of P21 DCP) to the Principal Certifier prior to issue of the Occupation Certificate.

Reason: To ensure geotechnical risk is mitigated appropriately.

#### 23. Waste Management Confirmation

Prior to the issue of an Occupation Certificate, evidence / documentation must be submitted to the Principal Certifier that all waste material from the development site arising from demolition and/or construction works has been appropriately recycled, reused or disposed of generally in accordance with the approved Waste Management Plan.

Reason: To ensure demolition and construction waste is recycled or reused and to limit landfill.

#### 24. Swimming Pool Requirements

The Swimming Pool shall not be filled with water nor be permitted to retain water until:

(a) All required safety fencing has been erected in accordance with and all other requirements have been fulfilled with regard to the relevant legislative requirements and relevant Australian Standards (including but not limited) to:

- (i) Swimming Pools Act 1992;
- (ii) Swimming Pools Amendment Act 2009;
- (iii) Swimming Pools Regulation 2018

(iv) Australian Standard AS1926 Swimming Pool Safety

(v) Australian Standard AS1926.1 Part 1: Safety barriers for swimming pools

(vi) Australian Standard AS1926.2 Part 2: Location of safety barriers for swimming pools

(b) A certificate of compliance prepared by the manufacturer of the pool safety fencing, shall be submitted to the Principal Certifier, certifying compliance with Australian Standard 1926.

(c) Filter backwash waters shall be discharged to the Sydney Water sewer mains in accordance with Sydney Water's requirements. Where Sydney Water mains are not available in rural areas, the backwash waters shall be managed onsite in a manner that does not cause pollution, erosion or run off, is separate from the irrigation area for any wastewater system and is separate from any onsite stormwater management system. Appropriate instructions of artificial resuscitation methods.

# (d) A warning sign stating 'YOUNG CHILDREN SHOULD BE SUPERVISED WHEN USING THIS POOL' has been installed.

- (e) Signage showing resuscitation methods and emergency contact
- (f) All signage shall be located in a prominent position within the pool area.
- (g) Swimming pools and spas must be registered with the Division of Local Government.

Details demonstrating compliance are to be submitted to the Principal Certifier prior to the issue of an Occupation Certificate.

Reason: To protect human life.

# ON-GOING CONDITIONS THAT MUST BE COMPLIED WITH AT ALL TIMES

#### 25. Landscape Maintenance

If any landscape materials/components or planting under this consent fails, they are to be replaced with similar materials/components. Trees, shrubs and groundcovers required to be planted under this consent are to be mulched, watered and fertilised as required at the time of planting. If any tree, shrub or groundcover required to be planted under this consent fails, they are to be replaced with similar species to maintain the landscape theme and be generally in accordance with the approved Landscape Plans and any conditions of consent.

The approved landscape area shall in perpetuity remain as planting under the development consent.

Reason: To maintain local environmental amenity.

## 26. Geotechnical Recommendations

Any ongoing recommendations of the risk assessment required to manage the hazards identified in the Geotechnical Report referenced in Condition 1 of this consent are to me maintained and adhered to for the life of the development.

Reason: To ensure geotechnical risk is mitigated appropriately.

#### 27. Swimming Pool/Spa Motor Noise

The swimming pool / spa motor shall not produce noise levels that exceed 5dBA above the background noise when measured from the nearest property boundary.

Reason: To ensure that the development does not impact on the acoustic privacy of surrounding residential properties.

In signing this report, I declare that I do not have a Conflict of Interest.

Signed

**Grace Facer, Planner** 

The application is determined on 20/01/2023, under the delegated authority of:

Bachny.

Steven Findlay, Manager Development Assessments
