RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

Dear assessing officer,

Why would we turn our world class beaches into a brick path because a couple of home owners are worried about the erosion that occurs when you live 8 meters away from the literal ocean... This sucks and it's going to look like England's grey beaches soon. Why not buy back the land and turn it into healthy dune? Because let's be real, no one wants to look at cement beaches. They are depressing, visually, conceptually, environmentally, sustainably, socially, culturally, and emotionally. All round BAD.

Sincerely, Kate
