RE: DA2021/2567 - 60 Federal Parade BROOKVALE NSW 2100

Traffic in the area around the school is nightmare at the best of time during school drop off/pick up periods. School traffic blocks our streets in the area causing issues with trying to get to and from my house. Additional students will only make this situation worse and the application has given no consideration to fixing this. Also increase in students will only lead to greater footprint of school buildings in the area as the school expands, as I am sure it will want to do in the future, requiring the removal of residential homes. This will only have negative impact to the local community and environmental conditions of the area. As such I object to this development application.
