RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

We live on Ferguson st and our main exit from the suburb onto the main road is at the end of our street onto Warringah rd. As many residents from our suburb and surrounding suburbs use this exit, it is very crowded during peak times, with cars backed up right down the street. Driving up the back way to Forest way is already a nightmare, as Grace Ave is so narrow and cars can only go one way at a time. It is already such a busy area of the neighbourhood with traffic and cars speed up and down Ferguson st all the time. We Cannot cope with More traffic - any new development at Forest way will need to make allowances for cars to get onto Warringah rd and Forest way accordingly. Surely all of that work knocking down trees and building tunnels will not be for nothing.
