RE: DA2019/0491 - 8 / 11 - 15 Spring Cove Avenue MANLY NSW 2095

The only question we have is... what activity will the owners propose doing on the church land once the gate is approved?

The land directly outside the new gate is, through the Parks and Wildlife Dept., already protected for the bandicoots and hopefully the water dragons, echidnas, brush turkeys and regrettably rabbits that inhabit that land. We have been assured by the owners that their dog will not have access to this land so as not to disturb the above. (Ticks).

The owners only have an exclusive 3 metre wide right of access passage way outside the proposed gate and along the length of the building in order to provide privacy. There must be no other activity on this land.

Thank you for your time in this assessment process.
