Re Mod 2020/0073

Carly

I have major concerns relating to the finishing required to external walls covered by this modification. All external walls including blast walls and setback walls must have the same finish as the rest of the structure.

Just because the walls are not visible from number 46 does not mean that they are unimportant and can be finished in an ugly form, which will be very visible from a neighbouring property including the eastern side of number 42-44 Victoria Pde.

Thanks in advance
