**RE: DA2020/0393 - 28 Lockwood Avenue BELROSE NSW 2085**

We objected to the last development proposal put forward a couple of years ago and are doing so again - for the same reasons! It is too big, too many apartments and unsuited to our area! We do not want anything like the development which is proposed - as appears to be the case with everyone else who actually lives in the surrounding area and would be personally impacted by such an eyesore. For starters, there is insufficient parking allocated to the development in general and there would be an overflow into surrounding streets and also Glenrose shopping centre - where it is already hard for shoppers to park when there is an event on at Glen Street Theatre. This development would also make the traffic problem around the area horrendous - the volume of traffic in Lockwood Avenue and Glen Steet is already high for residents trying to get in and out of driveways, and pedestrians, in particular, would be put at even greater risk than they are now. We have lived here since 1969 and the reason we are still here is that the area has not (yet!) been turned into a cold, impersonal, high rise menagerie which, having allowed it to happen once, would surely follow. It is therefore strongly recommended that the proposed development not be approved.
