Hi Phillip,

I am writing to object to the proposed Optus tower in the middle of John Fisher Park. From memory this is the third time Optus have tried to slide this proposal through council for approval, and this is the third time I and many other concerned residents have objected.

My youngest daughter plays netball there, and I and the rest of my family regularly walk our dog there.

There is strong scientific evidence of the health risks caused by electro magnetic radiation, so why on earth would anyone in good conscience approve the placing of such a tower **where children regularly play? It is also very close to Curl Curl North Public School**, where my youngest is a student.

There is plenty of published data on this, but here's a summary:

**Scientific Studies have found these symptoms
from Electro Magnetic Radiation**

<input checked="" type="checkbox"/> headaches/migraines	<input checked="" type="checkbox"/> cancer (brain & others)
<input checked="" type="checkbox"/> sleep disturbance & insomnia	<input checked="" type="checkbox"/> tingling & itching sensations
<input checked="" type="checkbox"/> heart arrhythmia/palpitation	<input checked="" type="checkbox"/> trembling & twitching
<input checked="" type="checkbox"/> skin rashes & allergies	<input checked="" type="checkbox"/> depression & mood changes
<input checked="" type="checkbox"/> concentration difficulties	<input checked="" type="checkbox"/> fibromyalgia, joint/muscle
<input checked="" type="checkbox"/> dizziness/vertigo	<input checked="" type="checkbox"/> pain
<input checked="" type="checkbox"/> memory loss	<input checked="" type="checkbox"/> chronic fatigue syndrome
<input checked="" type="checkbox"/> hyperactivity, ADD, ADHD	<input checked="" type="checkbox"/> multiple chemical sensitivity
<input checked="" type="checkbox"/> shortness of breath/asthma	<input checked="" type="checkbox"/> nosebleeds
<input checked="" type="checkbox"/> irritable bowel symptoms	<input checked="" type="checkbox"/> tinnitus
<input checked="" type="checkbox"/> blood pressure changes	<input checked="" type="checkbox"/> fatigue
<input checked="" type="checkbox"/> blood sugar fluctuations	<input checked="" type="checkbox"/> infertility

**5G has NOT been tested for safety
- we will be the experiment - do you consent?**

I hope you and council will have the good sense to reject this proposal.

Regards,

Justin Cooper
North Curl Curl Resident
