Subject: 16 Bangaroo Street, REV2022/0004 objection to revised plans

Hi Maxwell,

I wish to advise Council that the revised plans and reports for this application still do not address the issues I have raised in previous objections - specifically around noise and safety.

This development has no merit and is clearly strongly opposed by almost every local resident except the people lodging the application.

There are a multitude of submissions that highlight why that is the case. Why is this process being continually dragged out and not acted upon ?

The continual revisions to plans should be enough to see that the applicants are failing to find a solution to all of the problems with the conversion of the site and property to a purpose it is not designed or suitable for.

For about the fourth time, I trust that Council will continue to listen to the vast majority of residents and continue to uphold its previous decision and reject this application.

Please can we finish this process for once and for all and move on ... people have better things to do with their time.

Kind regards,
Andy Thompson
North Balgowlah resident.
