Waste Minimisation & Management Plan

Management During Construction

A Builder will be appointed to project manage the entire project, part of his overall duties will be to manage the environmental impacts of the project and ensure that contractors are suitably qualified and are site inducted which will include the instructions for the handling of waste materials. The project manager will also be responsible for the quantities and estimating of the required building materials and ensure a policy of accuracy is adopted to maintain the waste material to an absolute minimum. All contracts entered into will be conditional upon compliance with the Protection of the Environment Act and Local Council condition of consent approvals. Waste minimisation and reduction practices are to be adopted, Recover, Recycle and Reuse.

The site will be provided with waste management area screened off from the rest of the site and shall be one of the subjects addressed in the site induction program and the personnel working on site are to be instructed to correctly use it. This policy shall be strictly enforced at all times by the site project manager.

Commitments identified with a "\sqr" in the "Show on DA plans" column must be shown on the plans accompanying the development application for the proposed development (if a development application is to be lodged for the proposed development). Commitments identified with a "v" in the "Show on CC/CDC plans & specs" column must be shown in the plans and specifications accompanying the application for a construct certificate / complying development certificate for the proposed development.

Commitments identified with a "\sqrt in the "Certifier check" column must be certified by a certifying authority as having been fulfilled, before a final occupation certificate for the development may be issued.

In these commitments, "applicant" means the person carrying out the development.

Alterations and Additions

This certificate confirms that the proposed development will meet the NSW government's requirements for sustainability, if it is built in accordance with the commitments set out below. Terms used in this certificate, or in the commitments, have the meaning given by the document entitled "BASIX Alterations and Additions Definitions" dated 66/10/2017 published by the Department. This document is available at www.basix.nsw.gov.au
