Subject: Mr David Auster-Mod2019/0255

Attention Mr David Auster

Dear David,

Thank you for your letter regarding the proposed development at 25 Spring Cove Av Manly. I wish to make the following submission;

Most of the modifications do not affect me and are therefore not part of this submission. However your drawing L1 dated 5/19 which I have now seen for the first time show the planting of 3 trees (Melaleuca Armillaris) at the north eastern corner of the site. The Plant List shows that these trees grow to a height of 5 meters and they are directly in front of the main windows of my house thereby reducing even further what little view I have left of Spring Cove. Therefore I request that that these trees be replaced with plants that grow to a lower height say about 1 meter maximum.

Thank you for your assistance.

Kind Regards,

Paul Kearney
