Officer comments

This application has been assessed against relevant legislation and policy relating to waterways, riparian areas, and groundwater.

As this site drains into Careel Bay and the greater Pittwater estuary , the development must not significantly impact on the biophysical, hydrological or ecological integrity of these waters, or on the quantity and quality of surface and ground water flows to creeks or the waterway.

This application is supported as it is unlikely to have an adverse effect on the integrity and resilience of the biophysical, ecological and hydrological environment of Pittwater and its surrounding environment if conditions are adhered to.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.
