**RE: DA2020/0552 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100**

I would like to object to the proposal to build 24 luxury units on Crown Land at 181 Allambie Rd, Allambie Heights as well as creating firebreaks on the adjoining Manly Dam Reserve. This site is at the headwaters of Curl Curl Creek which flows to Manly Warringah War Memorial Park. This creek is the main feeder to Manly Dam and considered "of very high ecological value", being the only Sydney habitat of a native fish: the Climbing Galaxias Fish. This park is being nominated for National Heritage listing. Continual encroachment on this unique bushland will increase the amount of stormwater erosion and pollution flowing downstream, and promote the ever increasing loss of habitat for fauna: 5 threatened fauna species including the Eastern Pygmy Possum.
