## RE: DA2021/2083-5 Forest Road WARRIEWOOD NSW 2102

I am strongly opposed to the increase in students at the school, which at the current level already causes huge traffic and parking problems.
My home backs onto the school and P platers form years 11 and 12 already take all street parking during the day, and the very high number of students who are driven to school use Angophora Street as a drop off circuit, often double parking, parking across driveways and driving in the middle of the street.

The increase of 250 students will increase the number of cars associated with this including approximately $70-80$ more senior students and their cars. This is unacceptable.

The local area is growing and with the further developments and the extended playground/recreational areas being built will already bring more cars with parents bringing children who also compete for the limited parking.

We already have problems with garbage and delivery trucks accessing the street, and are forced to park illegally. Emergency vehicles have also had problems and have already had to park in the middle of the road and block all traffic because of the narrowness of the street and the already full parking.

It is already impossible for me to find parking near my own home should I need to leave before the students arrive and return mid morning and am forced to park some distance away, often several streets. Wet weather things are worse and there is no availability for deliveries or visitors.

The last development application from the school indicated use of existing property but resulted in 2 or 3 stories being added which has also adversely affected television and broadband reception and to accommodate extra students further development of property will exacerbate this problem.

Please do not allow this.
