**RE: DA2020/1514 - 0 L Federal Parade BROOKVALE NSW 2100**

I think this application cannot be accepted. The school is already large enough and I see no reason for further expansion. In fact, accepting this expansion will cause our current issues in Gulliver street to worsen.

We absolutely do not need anymore traffic jamming in our street. During the morning times and especially the afternoon, the traffic is so bad it could take 10 minutes just for the traffic to move slightly. We also really do not need any more cars taking our parking spaces. It becomes a huge inconvenience when the majority of our parking space has been taken up and having to wait what could be several hours just for the road to have little parking space.

There is also the increased in noise and this will only make it worse for the people living at home and giving the current world's state, this can really frustrate the people living in the block having to deal with this much noise everyday.

Sure, not many people may form a complaint to this, but consider this. I did not know this application existed until one of my neighbours informed me about it. He told us these exact complaints and problems that I have talked about and if me and him can agree on it, I think the majority of the block around this school can also agree that this issues that we need to deal with are frustrating. I am certain that if I were to inform the whole block about this application, they will most likely not agree with it and form a complaint.

Choosing to accept this application will only make these current issues worse and my family and me really do not need this. and I am certain that the majority of the street and block do not need these issues becoming worse either. I ask that you consider the people that live around this school and how frustrating it is having to deal with the traffic jam, lack of parking space and noise. I hope this submission will get you to understand that this application cannot be accepted.
