# **Bush Fire Assessment Report**

In relation to proposed development at:

No 1 Norma Road, Palm Beach, NSW

This assessment has been prepared and certified by: Matthew Toghill BPAD accredited practitioner FPAA Accreditation No: BPAD31642 Report No: 1Nor-01 Date: 14/09/2021	Alla.
Plans supplied by:	Blue Sky Building Design Project No: 2021017 Dated: 01.09.2021

## **Introduction**

The purpose of this report is to provide a bushfire risk assessment for the proposed new pool and surrounding deck at No 1 Norma Road, Palm Beach, NSW, and to certify that the plans and specifications provided are in accordance with the requirements of *Planning for Bushfire Protection 2019* and AS 3959-2018.

The site had been identified as 'bush fire prone land' for the purpose of Section 146 of the *Environmental Planning and Assessment Act 1979* and the Legislative requirements for building on bush fire prone lands are applicable.

The proposed development is an infill development as defined within chapter 7 of *Planning for Bushfire Protection 2019* and this report has been prepared in accordance with the requirements of Section 4.14 of the Environment Planning and Assessment Act.

Figure 1: Location of the subject site.

Figure 2: Bushfire prone land map.

## **Bushfire Risk Assessment**

Figure 3: Aerial photo showing the location of the subject site and surrounding bushland.

**Table 1**; reference Table A1.12.5 *Planning for Bush Fire Protection 2019.*Determination of the category of bushfire attack for the development, and subsequent required building standards.

Direction	Distance to classified vegetation	Vegetation Classification	Assessment of effective slope	FDI	Bushfire Attack Level
T1	0.00m	Short Heath	Downslope >15- 20 degrees*	100	BAL-FZ

**Summary:** Based upon the relevant provisions of PBP the anticipated radiant heat attack for the site is >40 kW/m2 and the subsequent Bushfire Attack Level is BAL-FZ AS 3959- 2018.

<sup>\*</sup> The slope to the east of the site consists of numerous sandstone escarpments stepping down steeply towards Whale Beach Road. For the purpose of this assessment, the effective slope will be assessed as the slope in between these escarpments as >15-20 degrees.

#### **Development Proposal**

The development proposal is for the construction of a new pool and surrounding deck.

#### **Construction requirements**

All new construction shall comply with a minimum standard of section 3 [construction general] and section 9 (BAL-FZ), AS3959-2018 and Chapter 7 of Planning for Bushfire Protection 2019.

#### **Pool**

For the purpose of this assessment the pool is considered a Class 10 structure. With reference to Planning for Bush Fire Protection 2019 Section 8.3.2, Class 10 structures that are located within 6m of a dwelling must be constructed in accordance with the NCC. Under the Deemed to Satisfy provisions of the NCC, building work on Bush Fire Prone Land must comply with AS 3959-2018 or the NASH Standard. In this instance all new construction should be of non-combustible material.

#### **Pool fencing**

With reference to *Planning for Bush Fire Protection 2019* Section 7.6, all fences in bush fire prone areas should be made of either hardwood or non-combustible material. However, in circumstances where the fence is within 6m of a building or in areas of BAL-29 or greater, they should be made of non-combustible material only.

#### **Retaining walls**

For the purpose of this assessment the retaining walls are considered a Class 10b structure. With reference to Planning for Bush Fire Protection 2019 Section 8.3.2, Class 10a and 10b structures that are located within 6m of a dwelling must be constructed in accordance with the NCC.

All new retaining walls should be constructed of masonry or other non-combustible material.

#### **Fences and gates**

All fences in bush fire prone areas should be made from either hardwood or non-combustible material. However, in circumstances where the fence connects directly to the dwelling, or in areas of BAL-29 or greater, they should be made of non-combustible material.

#### **Landscaping**

All new landscaping should be designed in accordance with the Asset Protection Zone (APZ) requirements as specified within Appendix 4 of PBP 2019.

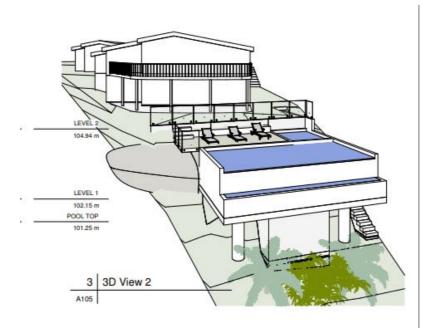

Figure 5: 3D perspective

#### **Summary**

This report consists of a bushfire risk assessment for the proposed new pool and surrounding deck at No. 1 Norma Road, Palm Beach, NSW.

The report concludes that the proposed development is on designated bushfire prone land and the legislative requirements for development of bushfire prone areas are applicable.

This report has considered all elements of bushfire attack and, it is my considered opinion that the development can satisfy the Objectives and Performance requirements of *Planning for bushfire Protection 2019* and *AS 3959 2018* if constructed in accordance with the recommendations made within this report.

<u>Note:</u> Notwithstanding the precautions adopted, it should always be remembered that bushfires burn under a wide range of conditions and an element of risk, no matter how small always remains, and although the standard id designed to improve the performance of such buildings, there can be no guarantee, because of the variable nature of bushfires, that any one building with withstand a bushfire attack on every occasion.

This report is a Bushfire Hazard Assessment that provides the required information to assist Local Councils and the Rural Fire Service in determining compliance in accordance with Planning for Bushfire Protection 2019 and AS3959, 2018. The local Council is the final consenting authority and the construction of the building must comply with the recommendations included in the council's conditions of consent.
