Attention: Development Assessment

Re Notice of Proposed Development DA2023/0718

I do not support the proposed DA as it will result in the loss of a significant number of canopy trees, including Eucalyptus robusta, Casuarina glauca, Melaleuca quinquenervia.

This will have adverse consequences on fauna habitat, particularly birdlife in a wildlife corridor.

The proposal for two trees to replace the loss of each tree removed, still results in the immediate loss of 23 mature trees. The replacement trees will take at least 20 years to mature.

The proposal will not benefit the wider community and is not in the public interest.

Your faithfully
