RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

Surfing daily at South Narrabeen is my sanity. To see whats becoming of this once serene, beautiful natural sanctuary is an abomination. not only aesthetically, resembling something from an apocalyptic Blomkamp film and having zero consideration for its surrounds, but mainly from a practical, functional and sustainability perspective. vertical seawalls ruin beaches. period. for surfers, for beachgoers and for the wildlife. whoever has approved this is putting a few wealthy landowners before any of this, whom ironically will have their properties devalued once this is built. who wants to live perched above a concrete monstrosity on a beach they can no longer use. Technically speaking the DA should be refused simply due to the fact that its lacking any real detail, clearly written with a 'she'll be right' approach to be bullied through without adequate community and council consultation. this must be stopped before this once beautiful natural wonder is destroyed forever. Please let common sense and your sense of community prevail.
