

## Natural Environment Referral Response - Biodiversity

<b>Application Number:</b>	DA2024/0322
<b>Proposed Development:</b>	Alterations and additions to a residential flat building
<b>Date:</b>	11/04/2024
<b>Responsible Officer</b>	Nick Keeler
<b>Land to be developed (Address):</b>	Lot 85 DP 70416 , 28 Reddall Street MANLY NSW 2095

### Reasons for referral

This application seeks consent development on land, or within 40m of land, containing:

- All Development Applications on
- Actual or potential threatened species, populations, ecological communities, or their habitats;
- Wildlife corridors;
- Vegetation query stipulating that a Flora and Fauna Assessment is required;
- Vegetation query - X type located in both A & C Wards;

And as such, Council's Natural Environment Unit officers are required to consider the likely potential environmental impacts.

### Officer comments

The comments in this referral relate to the following applicable controls and provisions:

- NSW Biodiversity Conservation Act 2016
- Manly LEP Clause 6.5 - Terrestrial biodiversity
- Manly DCP Clause 5.4.2 Threatened Species and Critical Habitat Land

The proposed alterations and additions to the residential building are unlikely to impact upon native flora and fauna. The subject site is located within declared habitat for the endangered population of long-nosed bandicoots of North Head. As such, a threatened species "test of significance" is required. This assessment has been conducted and has concluded that no significant impacts would take place. Conditions will be applied to avoid and minimise potential impacts to the endangered population.

No native vegetation or fauna habitat would be impacted, the development is designed, sited and will be managed to avoid any significant adverse environmental impact.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

**Recommended Natural Environment Conditions:**

**CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE**

**No Clearing of Vegetation**

Unless otherwise exempt, no vegetation is to be cleared prior to issue of a Construction Certificate.

Details demonstrating compliance are to be submitted to the Certifier prior to issue of Construction Certificate.

Reason: To protect native vegetation.

**CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK**

**Pre-clearance Survey**

Before any vegetation/materials/debris stockpiles are removed, a pre-clearance survey for Long-nosed Bandicoot activity and presence is required. Clearing should ideally be carried out at dusk and completed within one day so that Long-nosed Bandicoots do not reoccupy partially cleared areas overnight. A record of each inspection is to be made in the daily inspection register log-book. The logbook is to be made available to Principal Certifying Authority.

Written evidence of compliance (including records of inspections and any wildlife incidents) is to be provided to the Principal Certifier prior to any Occupation Certificate.

Reason: To protect native wildlife.

**Wildlife Protection**

If construction activity associated with this development results in injury or displacement of a native mammal, bird, reptile or amphibian, a licensed wildlife rescue and rehabilitation organisation must be contacted for advice.

If an uninjured Long-nosed Bandicoot enters the worksite or is found during a survey of holes/stockpiles, works must cease until the Bandicoot has safely vacated the worksite. Any injured or dead Long-nosed Bandicoots found within the worksite must be reported to the National Parks & Wildlife Service (NPWS). For assistance to relocate a Bandicoot from the worksite, or to report a dead or injured Bandicoot, please contact:

- National Parks & Wildlife Service – Duty Officer (9457 9577)

Reason: To protect native wildlife.
